

## **Canada/Mexico/US Trilateral Committee for Wildlife and Ecosystem Conservation and Management**

In 1996, the wildlife conservation agencies of the United States, Mexico, and Canada signed a Memorandum of Understanding establishing the Canada/Mexico/US Trilateral Committee for Wildlife and Ecosystem Conservation and Management. This agreement formally brought together for the first time the three nations of North America, consolidating a continental effort for wildlife and ecosystem conservation and management. The Trilateral Committee facilitates and enhances cooperation and coordination among the wildlife agencies of the three nations in projects and programs for the conservation and management of wildlife, plants, biological diversity, and ecosystems of mutual interest.

The Trilateral also facilitates the development of partnerships with other associated and interested entities. Delegations from each country come together annually for discussions on a wide range of topics ranging from joint, on-the-ground projects to issues of law enforcement to the development of information databases. Discussions take place under the auspices of working tables that report to an executive body comprising the directors of the three wildlife agencies. Currently, there are six active working tables: Species of Common Concern, Law Enforcement, Ecosystem Conservation, Migratory Birds, Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES), and the Executive Committee.

### **Next Meeting:**

The 20<sup>th</sup> meeting of the Trilateral will meet April 13-17<sup>th</sup>, 2014 in San Diego California, with a plenary focus on conservation of Monarch butterflies in North America.
