United States-Chile Fisheries Cooperation Program

Basic Instrument

The basic instrument establishing the United States-Chile Cooperation Program is a Memorandum of Understanding (MOU) between the U.S. National Marine Fisheries Service (NOAA Fisheries Service) and the Chilean Servicio Nacional de Pesca (SERNAPECASA) signed in 1995 and extended in 2004.

Implementing Legislation

The Magnuson-Stevens Fishery Conservation and Management Act (Act), particularly 16 U.S.C. 1822(a), authorizes the negotiation of international fishery agreements to further the purposes, policy, and provisions of the Act.

Member Nations

The United States and Chile

Budget

There are no funds specifically budgeted for the program; costs are assumed in the operating budgets of the participating NOAA Fisheries Service offices. Annual expenditures for the program including staff time, travel, translation services, and miscellaneous expenses total less than $20,000 annually.

Representation

The meetings are coordinated by NOAA Fisheries Service and SERNAPECASA. Both agencies often invite other agencies to participate in the meetings. NOAA Fisheries Service has invited representatives from other NOAA line offices, the Food and Drug Administration, U.S. Coast Guard, and the State Department. SERNAPECASA routinely invites other units of the Ministerio de Economía (the Subsecretaría de Pesca and the Instituto de Fomento Pesquero) as well as industry representatives. SERNAPECASA has also invited representatives of the Chilean Navy and Ministerio de Relaciones Exteriores (Foreign Ministry) to attend some sessions.

Description

A. Mission/Purpose:

The participants have agreed to periodically review the United States-Chilean fisheries relationship. The resulting Fishery Cooperation Talks (FCT) provide a forum for U.S. and Chilean fishery officials to review fishery issues of mutual concern. Formal and informal sessions provide opportunities to exchange information and discuss major issues, resulting in a frank exchange of views and information.

B. Programs:

NOAA Fisheries and SERNAPECASA agreed to hold annual meetings during the first few years of the cooperative program. The two Parties now intend to meet every 18-24 months. Recent meetings have included discussions on management, enforcement, recreational fisheries, marine mammals and endangered species, research, environment, aquaculture, and information exchange. The meetings help to inform participants of national programs affecting the other country.

C. Conservation and Management Measures:

Conservation and management issues are generally the major topics discussed at the meetings. The protection of marine mammals was initially the primary focus of the meetings and continues to be an important element. NOAA Fisheries Service has additionally raised some concerns about Pacific sea turtles, especially leatherbacks. Other important conservation and management issues discussed include enforcement, management strategies and systems, and recreational
fishing. Discussions on these issues as well as information exchanges and visits have enabled NOAA Fisheries and Chilean fishery agencies to exchange ideas and experiences in formulating domestic policies as well as to work further on species of mutual interest.

D. 2011 Meeting:

The most recent (Tenth) Fishery Cooperation Talks between fishery officials of the United States and Chile were convened in Viña del Mar, Chile, 19-20 April 2011. The Chilean delegation included representatives of units of the Fisheries Under-Secretariat (SUBPESCA), the National Fisheries Service (SERNAPESCA), the Fisheries Development Institute (IFOP), and the Chilean Navy (General Directorate of Maritime Territory and the Merchant Marine). The U.S. Delegation included participants from various NOAA Fisheries Service, aquaculture experts from USDA-APHIS and representatives of Embassy Santiago. The discussions explored cooperative efforts in six major issue areas: (1) research, (2) enforcement, (3) administrative/management, (4) multilateral initiatives, (5) aquaculture, and (6) environment. The two Parties are in the process of updating the MOU that provides a workplan for our cooperation.

Future Meetings

The United States is expected to host the next meeting. The Southwest Fisheries Science Center has indicated that they would like to host. Preliminary discussions with Chile point to a summer 2014 date.
