NOAA
FISHERIES

The 2016 Saltonstall-Kennedy Grant Program

- NOAA Fisheries announced the availability of funding for a 2016 Competitive S-K Solicitation
- The Request for Applications (RFA) will remain open for 60 days. This RFA will close 11/02/2015
- The RFA and Full Funding Opportunity (FFO) can be found at www.grants.gov
- FFO#: NOAA-NMFS-FHQ-2016-2004617

NOAA
FISHERIES

Eligibility

Who Can Apply?

Who Can Apply to the S-K Program?

- You are a citizen or national of the United States
- You are a citizen of the Republic of the Marshall Islands, Republic of Palau, or the Federated States of Micronesia
- You represent an entity that is a citizen
 - Corporation, partnership, association, or other non-Federal entity, non-profit or otherwise (including Indian Tribes)

Objective of the S-K Program

NOAA
FISHERIES

Program
Objective

- The objective of the S-K Grant Program is to address the needs of fishing communities in optimizing economic benefits by building and maintaining sustainable fisheries and practices, dealing with the impacts of conservation and management measures, and increasing other opportunities to use existing infrastructure to support keeping working waterfronts viable.
- NMFS seeks applications that demonstrate direct benefits to the U.S. fishing industries and encourages proposals that involve fishing community participation

NOAA
FISHERIES

Promote and
Development

The 2016 S-K Priorities

1. Aquaculture
2. Fisheries Data Collection
3. Techniques for Reducing Bycatch and other Adverse Impacts
4. Adapting to Climate Change and Other Long Term Ecosystem Change
5. Promotion, Development and Marketing
6. Socio-Economic Research
7. Territorial Science

Aquaculture

NOAA
FISHERIES

Priorities

1. Aquaculture

Project that:

- (1) demonstrate marine aquaculture technologies in pilot and commercial scale projects that will create jobs in coastal communities, produce healthful local seafood, revitalize working waterfronts and support traditional fishing communities
- (2) provide training for fishermen and others in coastal communities in aquaculture production methods
- (3) document and assess socioeconomic impacts of marine aquaculture operations.

Fishery Data Collection

NOAA
FISHERIES

Priorities

2. Fishery Data
Collection

Projects that:

- 1) Improve the cost-effectiveness, accuracy, timeliness, and methods for the collection, reporting and dissemination of both fishery dependent data and fishery independent data.

NOAA
FISHERIES

Priorities

3. Reducing
Adverse Impacts

Techniques for Reducing Bycatch and other Adverse Impacts

Projects that:

- 1) Develop or transfer selective fishing gears or procedures
- 2) Reduce impacts to protected species, candidate/species of concern, and stocks that are overfished
- 3) reduce or eliminate adverse interactions between fishing operations and non-targeted, protected, or prohibited species, essential fish habitat; or critical habitat
- 4) Improve the survivability of species discarded or intentionally released

NOAA
FISHERIES

Adapting to Climate Change and Other Long Term Ecosystem Change

Projects that:

Priorities

4. Adapting to
Climate Change

1. Assess the impact of climate change, ocean acidification, and other stressors
2. Conduct research that better informs fishery managers on the predator-prey dynamic
3. Aid in the understanding and integration of the complex interactions of marine species

**NOAA
FISHERIES**

Priorities

5. Promotion, Development and Marketing

Promotion, Development and Marketing

Projects that:

1. Promote better business practices to increase product market value
2. Develop collaborative and improved regional, national, and global public relations and marketing opportunities for U.S. seafood industries
3. Develop projects that support the creation of new marketing opportunities
4. Develop usable, value-added fisheries products from economic discards, byproducts of processing, and introduced/nuisance species

Fisheries Socioeconomics

Projects that:

- 1) improve the understanding of the socioeconomic aspects of fisheries to increase information on current and future consequences of management choices for use by decision makers and stakeholders.
- Scope includes commercial, recreational, and subsistence fishing and fishing-related businesses and fishing communities.

NOAA
FISHERIES

Priorities

6. Fisheries
Socioeconomics

NOAA
FISHERIES

Priorities

7. Territorial
Science

Territorial Science

Projects under this theme are intended to improve the quality and quantity of fishery information from the U.S. territories covered by the Magnuson Act, including the territories of American Samoa, Guam, and the U.S. Virgin Islands; and the Commonwealths of the Northern Mariana Islands and Puerto Rico, that can be used for establishing, enhancing and monitoring Annual Catch Limits (ACLs) for Federal fisheries management in these territories.

NOAA
FISHERIES

Priorities

Territorial Science

Continued...

Territorial Science

Projects that:

- 1) improve catch accountability by enhancing fishery statistics in each territory through a variety of techniques, including expanded creel surveys, fish dealer sampling, and other mechanisms
- 2) expand fishery bio-sampling and analysis of bio-sampling data, including activities that would include sampling shoreside and at fish dealers the species of fish most relevant for management
- 3) conduct fishery independent reef fish surveys.
- 4) build critical on-island capacity which could include building home-grown scientific capacity by partnering with local academic institutions to include students in the fishery statistics data collection and bio-sampling life history studies.

Applying to the S-K Program

NOAA
FISHERIES

www.Grants.gov

Apply for Grants

- Access “www.Grants.gov”
- Apply for Grants
- Step 1: “Download a Grants Application Package”
 - **NOAA-NMFS-FHQ-2016-2004617**
- Select the 2016 Saltonstall-Kennedy Competition

NOAA
FISHERIES

www.Grants.gov

Apply for Grants

The Application Process

- Step 1: "Download a Grants Application Package"
 - **NOAA-NMFS-FHQ-2013-2003834**
- Application Instructions and S-K FFO
 - Read the FFO
- Application Package
 - Required Forms
 - SF-424
 - SF-424A
 - SF-424B
 - CD-511
 - SF-LLL
 - Narrative Attachments
 - Project Summary
 - Project Narrative
 - Budget Narrative
 - Other Attachments including NEPA Questionnaire

NOAA
FISHERIES

NEPA

The National Environmental Policy Act - Questionnaire

- (1) The NEPA questionnaire was created to obtain information generally missing from grant applications/project proposals. Read and answer each question.

- (2) Provide specific information on all work that occurs in the water/environment.

- (3) Provide detail about catch.

- (4) Provide detail about the location and timing of any on the water sampling/fishing activities.

- (5) If the answer to NEPA questionnaire questions is NO, please provide reference/support in the proposal.

2016 Saltonstall-Kennedy

Important General Information

- Make sure you are eligible
- Download the FFO from www.Grants.gov
- Read the FFO
 - NOAA-NMFS-FHQ-2016-2004617
- Make sure your project fits the program objectives and priorities
- Register with www.grants.gov
- Apply to NOAA through www.grants.gov

NOAA
FISHERIES

2016 Saltonstall-Kennedy

Important General Information Continued...

- The 2016 S-K Solicitation Closes 11/02/2015 at 11:59PM (eastern time)
- All applications **MUST** be submitted prior to the close of this solicitation. Late Applications will not be reviewed.
- Applications must request between \$25K and \$300K in Federal Assistance

NOAA
FISHERIES

Selection
Process

How will my Application be Evaluated?

- All Applications will be reviewed for merit as outlined in the FFO
- The following Evaluation Criteria are discussed in the FFO:
 - Importance/ Relevance
 - Technical/ Scientific Merit
 - Qualifications of the applicants
 - Project Costs
 - Outreach and Education

NOAA
FISHERIES

When Will I Know?

NOAA
FISHERIES

The S-K Timeline

- The Request for Applications is open for 60 days
- RFA closes 11/02/2015
- Due to the number of applications anticipated, and the robust review process applicants will be contacted by NOAA during the month of May
