## DEPARTMENT OF COMMERCE

### International Trade Administration

#### Aerospace Supplier Development Mission to China; Recruitment Reopened for Additional Applications

**AGENCY:** International Trade  
Administration, Department of  
Commerce.

**ACTION:** Notice.

#### Timeframe for Recruitment and Applications

Mission recruitment will be conducted in an open and public manner, including publication in the **Federal Register**, posting on the Commerce Department trade mission calendar (<http://www.ita.doc.gov/doctm/tmcal.html>) and other Internet web sites, press releases to general and trade media, direct mail, notices by industry trade associations and other multiplier groups, and publicity at industry meetings, symposia, conferences, and trade shows.

The recruitment has reopened and the deadline for additional applications is extended to September 29, 2010. The U.S. Department of Commerce will review all additional applications after the deadline. We will inform applicants of selection decisions as soon as possible after the deadline. Applications received after the deadline will be considered only if space and scheduling constraints permit.

Companies who have already applied do not need to reapply.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

RIN 0648-XZ21

#### Notice of Intent to Prepare a Programmatic Environmental Impact Statement on Implementing Recovery Actions for Hawaiian Monk Seals

**AGENCY:** National Marine Fisheries  
Service (NMFS), National Oceanic and  
Atmospheric Administration (NOAA),  
U.S. Department of Commerce.

**ACTION:** Notice of Intent to prepare a  
Programmatic Environmental Impact  
Statement; announcement of public  
scoping period; request for comments.

**SUMMARY:** The National Marine  
Fisheries Service (NMFS) announces its  
intent to prepare a Programmatic  
Environmental Impact Statement (PEIS)  
to analyze the environmental impacts of  
implementing specific management  
actions and administering the associated  
research and enhancement program for  
Hawaiian monk seals (*Monachus  
schauinslandi*) in the Northwestern and  
Main Hawaiian Islands. Publication of  
this notice begins the official public  
scoping process that will help identify  
alternatives and determine the scope of  
environmental issues to be considered  
in the PEIS.

**ADDRESSES:** Written statements and  
questions regarding the public scoping  
process must be postmarked by  
November 15, 2010. To be included on  
a mailing list and receive newsletters  
and copies of the Draft and Final PEIS,  
please send mailing address and/or  
email address to Jeff Walters, Hawaiian  
Monk Seal Recovery Coordinator,  
Protected Resources Division, NOAA  
NMFS Pacific Islands Regional Office,  
1601 Kapiolani Blvd., Suite 1110,  
Honolulu, HI 96814. Comments on this  
notice and the scoping process for this  
action may be submitted by:

- Mail: 1601 Kapiolani Blvd., Suite  
1110, Honolulu, HI 96814.
- Scoping Meetings: Oral and written  
comments will be accepted during the  
upcoming scoping meetings. See  
**SUPPLEMENTARY INFORMATION, SCOPING  
MEETINGS** (below) for dates and  
locations of public scoping meetings for  
this issue.
- Email: [monkseal@noaa.gov](mailto:monkseal@noaa.gov).

**FOR FURTHER INFORMATION CONTACT:** Jeff  
Walters, NMFS Pacific Islands Regional  
Office, 1601 Kapiolani Blvd., Suite  
1110, Honolulu, HI 96814, or via the  
following email address:  
[monkseal@noaa.gov](mailto:monkseal@noaa.gov).

**SUPPLEMENTARY INFORMATION:** NMFS is  
the Federal agency responsible for

management of Hawaiian monk seals,  
under the Endangered Species Act  
(ESA; 16 U.S.C. 1531 *et seq.*) and the  
Marine Mammal Protection Act (MMPA;  
16 U.S.C. 1361 *et seq.*). NMFS funds and  
conducts research and enhancement  
activities on Hawaiian monk seals in the  
Northwestern Hawaiian Islands (NWHI)  
and Main Hawaiian Islands (MHI). In  
1976, NMFS listed Hawaiian monk seals  
as “endangered” under the ESA and  
“depleted” under the MMPA. As  
required under section 4 of the ESA,  
NMFS published a Recovery Plan for  
the species in 1983, which was revised  
in 2007. The funds administered by  
NMFS to implement recovery actions,  
including research and enhancement,  
have been designated by Congress and  
allocated within NMFS’ annual budgets  
for the purpose of promoting Hawaiian  
monk seal recovery. The intent of this  
PEIS is to evaluate, in compliance with  
the National Environmental Policy Act  
(NEPA; 42 U.S.C. 4321 *et seq.*), the  
potential direct, indirect, and  
cumulative impacts on the human  
environment of the alternative  
approaches to implementing recovery  
actions, including research and  
enhancement activities, under the  
Hawaiian monk seal recovery program.

#### Background

The Hawaiian monk seals’ population  
has experienced a prolonged decline  
and currently only approximately 1,200  
monk seals remain. Numerous threats to  
the survival of Hawaiian monk seals are  
identified in the Hawaiian monk seal  
Recovery Plan. In the NWHI, young  
seals are starving, pups are being killed  
by sharks, seals are getting entangled in  
marine debris, and sea level rise  
threatens terrestrial habitats. Low  
juvenile survival over the past two  
decades is the primary cause of the  
population’s decline. There is  
insufficient recruitment into the  
breeding population, and the population  
decline will likely continue without  
intervention. Enhancement activities,  
including but not limited to  
translocating seals from areas of lower  
to higher survival probability, are being  
considered to improve juvenile survival  
and the overall health of the population.

The purpose of implementing  
recovery activities for Hawaiian monk  
seals is to promote the recovery of the  
species population to levels at which  
ESA protection is no longer needed.  
Research, enhancement, and  
management activities on Hawaiian  
monk seals considered in this PEIS are  
funded, undertaken, and permitted by  
NMFS, which are federal actions  
requiring NEPA compliance. The need  
for this action is rooted in fundamental

biological and ecological factors that are now limiting the population. As part of this action, NMFS is developing measures that will help identify factors limiting the population, minimize human-induced impacts and other factors affecting survival, promote recovery, prevent harm, and avoid jeopardy or continued disadvantage to the species. Research and monitoring will continue to play a key role in determining whether enhancement activities achieve their desired outcomes.

NMFS administers funds that have been designated by Congress and allocated within NMFS' annual budget for the purpose of implementing recovery actions on Hawaiian monk seals. Using these funds, NMFS implements various management, research, and enhancement activities for recovery of the species. This PEIS would satisfy the NEPA compliance requirements for funding and undertaking recovery actions for Hawaiian monk seals, including the subset of actions requiring MMPA and ESA permits.

The purposes of the ESA, as described in section 2, are to provide a means whereby the ecosystems upon which threatened and endangered species may depend may be conserved, to provide a program for the conservation of such threatened and endangered species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions set forth in section 2(a) of the ESA.

### Proposed Action and Possible Alternatives

This notice initiates a public scoping period that will help determine the structure of each alternative considered in the PEIS. NMFS has identified the proposed action and several other alternatives, including the No Action Alternative. The final scope and structure of the alternatives will reflect the combined input from the public, research institutions, affected State and Federal agencies, and NMFS administrative and research offices. The number and structure of the alternatives that are analyzed in the PEIS will be determined at a later date. Themes to include in the range of potential alternatives are presented here to provide a framework for public comments:

- **No Action Alternative:** Under this alternative, currently permitted research and enhancement activities on Hawaiian monk seals would continue until expiration of the permit in 2014 (NMFS ESA-MMPA Permit No. 10137-04 issued to the NMFS Pacific Islands

Fisheries Science Center). Recovery Plan actions authorized by this permit would not be implemented beyond 2014. Currently, the existing research and enhancement activities include, but are not limited to:

1. Population assessment (e.g., counting, resighting, marking for identification, flipper tags);
2. Health and disease studies (e.g., tissue sampling, morphometric measurements);
3. Foraging studies (e.g., telemetry, scat collection);
4. De-worming research (e.g., fecal samples, testing anti-parasite treatments);
5. Translocation of weaned pups within the NWHI to improve juvenile survival;
6. Mitigation of fishery interactions (e.g., disentanglement, removal of fishing hooks); and
7. Mitigation of adult male aggression (e.g., removal and relocation of aggressive males).

- **Status Quo Alternative:** The Status Quo Alternative would consist of the existing types and scope of management, research and enhancement activities (including those identified in the No Action Alternative). New permits would be issued to maintain the current levels of research and enhancement activities. Existing management activities include but are not limited to protecting seals that haul out on recreational beaches and creating effective outreach messages, brochures, signs and volunteer programs to minimize human disturbance and other adverse impacts.

- **Enhanced Implementation Alternative (Proposed Action):** The Proposed Action would result in implementation and continuation of activities identified in the Status Quo, as well as additional activities to achieve more comprehensive Recovery Plan implementation. These additional activities would include, but are not limited to:

1. Vaccination studies (including potential vaccination);
2. Aversive conditioning (e.g., the development of tools to modify undesirable seal behavior including interactions with humans or domestic animals);
3. Archipelago-wide translocation to improve juvenile survival; and
4. De-worming.

The PEIS will assess the direct, indirect, and cumulative effects of implementing the alternative approaches for funding, undertaking, and permitting the management, research and enhancement activities on Hawaiian monk seals as well as other

components of the marine ecosystem and human environment. Anyone having relevant information they believe NMFS should consider in its analysis should provide a description of that information along with complete citations for supporting documents.

### Public Involvement

Scoping is an early and open process for determining the scope of issues to be addressed in a PEIS and for identifying the significant issues related to the proposed action. A principal objective of the scoping and public involvement process is to identify a range of reasonable management alternatives that will delineate critical issues and provide a clear basis for distinguishing among those alternatives and selecting a preferred alternative. Through this notice, we are notifying the public that a NEPA analysis and decision-making process for this proposed action has been initiated so that interested or affected people may participate and contribute to the final decision. NMFS will ask for additional public comments once the Draft PEIS is prepared and available. For additional information about Hawaiian monk seals and the PEIS process, please visit our website at <http://www.nmfs.noaa.gov/pr/permits/eis/hawaiianmonkseal.htm>. NMFS estimates the Draft PEIS will be available in late spring 2011.

### Scoping Meetings

Public scoping meetings will be held on the following dates, times, and locations:

1. Wednesday, October 20, 2010, 5:30 — 8:30 p.m., Central Union Church, 1660 South Beretania Street, Honolulu, O'ahu;
2. Thursday, October 21, 2010, 6 — 9 p.m., Mokuapapa Discovery Center, 308 Kamehameha Avenue, Suite 109, Hilo, Hawai'i;
3. Monday, October 25, 2010, 6 — 9 p.m., NOAA Sanctuaries New Community Learning Center, 726 South Kihei Road, Kihei, Maui;
4. Tuesday, October 26, 2010, 6 — 9 p.m., Hale Mahaolu Home Pumehana, 290 Kolapa Place, Kaunakakai, Moloka'i; and
5. Wednesday, October 27, 2010, 6 — 9 p.m., Wilcox Elementary School, 4319 Hardy Street, Lihou'e, Kaua'i.

Comments will be accepted at these meetings as well as during the scoping period, and can be submitted to NMFS by November 15, 2010 (see **FOR FURTHER INFORMATION CONTACT**). We request that you include in your comments: (1) Your name, address, and affiliation (if any); and (2) Any background documents to

support your comments as you think necessary.

### Special Accommodations

These meetings are accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Rachel Sprague, (808) 944-2200 (phone) or (808) 973-2941 (fax), at least 5 days before the scheduled meeting date.

Dated: September 22, 2010.

## DEPARTMENT OF COMMERCE

### International Trade Administration

[A-201-838]

#### Seamless Refined Copper Pipe and Tube From Mexico: Final Determination of Sales at Less Than Fair Value

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**SUMMARY:** The U.S. Department of Commerce ("the Department") has determined that imports of seamless refined copper pipe and tube ("copper pipe and tube") from Mexico are being, or are likely to be, sold in the United States at less than fair value ("LTFV"), as provided in section 735 of the Tariff Act of 1930, as amended ("the Act"). The estimated margins of sales at LTFV are listed in the "Continuation of Suspension of Liquidation" section of this notice.

**DATES:** *Effective Date:* October 1, 2010.

**FOR FURTHER INFORMATION CONTACT:** Joy Zhang or George McMahon, AD/CVD Operations, Office 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230; telephone: (202) 482-1168 or (202) 482-1167, respectively.

#### SUPPLEMENTARY INFORMATION:

#### Background

On May 12, 2010, the Department published in the *Federal Register* its preliminary determination on copper pipe and tube from Mexico. See *Seamless Refined Copper Pipe and Tube from Mexico: Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination*, 75 FR 26726 (May 12,

2010) ("*Preliminary Determination*").<sup>1</sup>

We selected the following companies for individual examination: IUSA S.A. de C.V. ("IUSA") and Nacional de Cobre, S.A. de C.V. ("Nacobre").

See *Preliminary Determination*, 75 FR at 26726.

As provided in section 782(i) of the Act, we conducted sales and cost verifications of the questionnaire responses submitted by IUSA and Nacobre. We used standard verification procedures, including examination of relevant accounting and production records, as well as original source documents provided by IUSA and Nacobre.<sup>2</sup> All verification reports are on file and available in the Central Records Unit ("CRU"), Room 7046, of the main Department of Commerce building.

On July 23, 2010 and July 26, 2010, respectively, IUSA and Nacobre, submitted sales and cost databases with revisions that reflect the minor corrections presented during their respective verifications.<sup>3</sup> IUSA, Nacobre, and the petitioners<sup>4</sup> filed their case briefs with the Department on August 4, 2010, and rebuttal briefs on August 10, 2010. At the petitioners' request, we held a hearing on August 12, 2010.

We used IUSA's July 23, 2010, and Nacobre's July 26, 2010, sales and cost databases to calculate IUSA's and Nacobre's antidumping duty margin. No parties have objected to the use of these databases.

On September 13, 2010, the Department placed a memorandum on the record of this case regarding a recent

<sup>1</sup> On May 28, 2010, the Department also published in the *Federal Register*, *Seamless Refined Copper Pipe and Tube From Mexico: Correction to Notice of Preliminary Determination of Sales at Less Than Fair Value 75 FR 29990 (May 28, 2010) and Postponement of Final Determination* to correct the Scope section of the *Preliminary Determination*.

<sup>2</sup> See Memorandum to the File titled "Verification of the Sales Response of IUSA S.A. de C.V. ("IUSA") and its affiliates ("IUSA") in the Antidumping Duty Investigation of Seamless Refined Copper Pipe and Tube from Mexico, dated July 21, 2010" "Verification of the Cost Response of IUSA, S.A. de C.V. in the Antidumping Duty Investigation of Seamless Refined Copper Pipe and Tube from Mexico, dated July 19, 2010" "Verification of the Sales Response of Nacobre, S.A. de C.V. and its affiliates ("Nacobre") in the Antidumping Duty Investigation of Seamless Refined Copper Pipe and Tube from Mexico," dated July 21, 2010, and "Verification of the Cost Response of Nacobre, S.A. de C.V. and its affiliates ("Nacobre") in the Antidumping Duty Investigation of Seamless Refined Copper Pipe and Tube from Mexico," dated July 22, 2010.

<sup>3</sup> See IUSA's July 23, 2010, and Nacobre's July 26, 2010, submission of the sales and cost databases.

<sup>4</sup> The petitioners in this investigation are Cerro Flow Products, Inc., KobeWieland Copper Products, LLC, Mueller Copper Tube Products, Inc., and Mueller Copper Tube Company, Inc. (collectively, "petitioners").

*ex parte* meeting in which Francisco J. Sánchez, Under Secretary for International Trade Administration met with Mr. Carlos Peralta, President and Director General of IUSA. The Department invited interested parties to comment on this memorandum by September 17, 2010; however, no comments were received.

#### Period of Investigation

The period of investigation ("POI") is July 1, 2008, to June 30, 2009. This period corresponds to the four most recent fiscal quarters prior to the month of the filing of the petition. See 19 CFR 351.204(b)(1).

#### Scope of Investigation

For the purpose of this investigation, the products covered are all seamless circular refined copper pipes and tubes, including redraw hollows, greater than or equal to 6 inches (152.4 mm) in length and measuring less than 12.130 inches (308.102 mm) (actual) in outside diameter ("OD"), regardless of wall thickness, bore (e.g., smooth, enhanced with inner grooves or ridges), manufacturing process (e.g., hot finished, cold-drawn, annealed), outer surface (e.g., plain or enhanced with grooves, ridges, fins, or gills), end finish (e.g., plain end, swaged end, flared end, expanded end, crimped end, threaded), coating (e.g., plastic, paint), insulation, attachments (e.g., plain, capped, plugged, with compression or other fitting), or physical configuration (e.g., straight, coiled, bent, wound on spools).

The scope of this investigation covers, but is not limited to, seamless refined copper pipe and tube produced or comparable to the American Society for Testing and Materials ("ASTM") ASTM-B42, ASTM-B68, ASTM-B75, ASTM-B88, ASTM-B88M, ASTM-B188, ASTM-B251, ASTM-B251M, ASTM-B280, ASTM-B302, ASTM-B306, ASTM-359, ASTM-B743, ASTM-B819, and ASTM-B903 specifications and meeting the physical parameters described therein. Also included within the scope of this investigation are all sets of covered products, including "line sets" of seamless refined copper tubes (with or without fittings or insulation) suitable for connecting an outdoor air conditioner or heat pump to an indoor evaporator unit. The phrase "all sets of covered products" denotes any combination of items put up for sale that is comprised of merchandise subject to the scope.

"Refined copper" is defined as: (1) Metal containing at least 99.85 percent by weight of copper; or (2) metal containing at least 97.5 percent by weight of copper, provided that the

due to space limitations via webcast only—and will be streamed live on the BBG's public Web site at <http://www.bbg.gov>. The meeting will also be made available on the BBG's public Web site for on-demand viewing.

**CONTACT PERSON FOR MORE INFORMATION:** Persons interested in obtaining more information should contact Paul Kollmer-Dorsey at (202) 203-4545.

**Paul Kollmer-Dorsey,**  
Deputy General Counsel.

## DEPARTMENT OF COMMERCE

### Foreign-Trade Zones Board

[Docket 64-2010]

#### Foreign-Trade Zone 78—Nashville, TN; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Metropolitan Government of Nashville and Davidson County, grantee of FTZ 78, requesting authority to expand FTZ 78 to include sites in La Vergne, Clarksville and Gallatin, Tennessee. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on November 5, 2010.

FTZ 78 was approved by the Board on April 2, 1982 (Board Order 190, 47 FR 16191, 4/15/82) and expanded on February 18, 1999 (Board Order 1024, 64 FR 9472, 2/26/1999), October 24, 2000 (Board Order 1124, 65 FR 66231, 11/03/2000), and September 30, 2002 (Board Order 1249, 67 FR 62697, 10/08/2002). The current zone project includes the following sites: *Site 1* (1.2 acres)—General-Warehousing Space, 750 Cowan Street, Nashville; *Site 2* (57.0 acres)—Cockrill Bend Industrial Park, 7355 Cockrill Bend Boulevard, Nashville; *Site 3* (9.2 acres)—Irish Express Way Logistics, 323 Mason Road, La Vergne; *Site 4* (39 acres)—Space Park North Industrial Park, 1000 Cartwright Street, Goodlettsville; *Site 5* (19 acres)—Old Stone Bridge Industrial Park, Old Stone Bridge, Goodlettsville; *Site 6* (806 acres)—Nashville International Airport, One Terminal Drive, Nashville; and *Site 7* (80 acres)—Eastgate Business Park, 3850 Eastgate Boulevard, Lebanon.

The applicant is requesting authority to expand the zone to include sites in La Vergne, Clarksville and Gallatin, Tennessee: *Proposed Site 8* (55.0 acres)—Ozburn-Hessey Logistics, 300

New Sanford Road, La Vergne; *Proposed Site 9* (1,546.0 acres)—Clarksville Commerce Park, between Highway 79 and Rossview Road on International Boulevard, Clarksville; *Proposed Site 10* (139.0 acres)—River Chase Barge Port, 41A Bypass and Beacon Road, Clarksville; *Proposed Site 11* (500.0 acres)—Nyrstar Company, 1800 Zinc Plant Road, Clarksville; and *Proposed Site 12* (451.0 acres)—Gallatin Industrial Center, Airport Road and Gateway Drive, Gallatin. The sites will provide warehousing and distribution services to area businesses. No specific manufacturing authority is being requested at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, Maureen Hinman of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 11, 2011. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to January 26, 2011.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 2111, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230-0002, and in the "Reading Room" section of the Board's Web site, which is accessible via <http://www.trade.gov/ftz>.

For further information, contact Maureen Hinman at [maureen.hinman@trade.gov](mailto:maureen.hinman@trade.gov) or (202) 482-0627.

Dated: November 5, 2010.

**Andrew McGilvray,**  
Executive Secretary.

### National Oceanic and Atmospheric Administration

RIN 0648-XZ21

#### Notice of Intent To Prepare a Programmatic Environmental Impact Statement on Implementing Recovery Actions for Hawaiian Monk Seals

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce.

**ACTION:** Notice of Intent to prepare a Programmatic Environmental Impact Statement; extension of public scoping period; request for comments.

**SUMMARY:** On October 1, 2010, NMFS published a Notice of Intent to prepare a Programmatic Environmental Impact Statement (PEIS) on Recovery Actions for Hawaiian monk seals (75 FR 60721). Public comments were due by November 15, 2010. NMFS has decided to allow additional time for submission of public comments on this action.

**DATES:** The public comment period for this action has been extended 15 days. Written comments must be received or postmarked by November 30, 2010.

**ADDRESSES:** Comments on the Notice of Intent and the scoping process for this action may be submitted by:

- *Mail:* National Marine Fisheries Service, Pacific Islands Regional Office, Hawaiian Monk Seal Recovery Actions PEIS, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814; or

- *E-mail:* [monkseal@noaa.gov](mailto:monkseal@noaa.gov).

To be included on a mailing list and receive newsletters and copies of the Draft and Final PEIS, please send your mailing address and/or e-mail address to Jeff Walters, Hawaiian Monk Seal Recovery Coordinator, Protected Resources Division, NOAA NMFS Pacific Islands Regional Office, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814, or via the following e-mail address: [monkseal@noaa.gov](mailto:monkseal@noaa.gov).

**FOR FURTHER INFORMATION CONTACT:** Jeff Walters, NMFS Pacific Islands Regional Office, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814, or [monkseal@noaa.gov](mailto:monkseal@noaa.gov).

**SUPPLEMENTARY INFORMATION:** The Notice of Intent, published on October 1, 2010, is available upon request and can be found on the following Web site: <http://www.nmfs.noaa.gov/pr/permits/eis/hawaiianmonkseal.htm>.

The PEIS will assess the direct, indirect, and cumulative effects of implementing the alternative approaches for funding, undertaking,

and permitting the management, research and enhancement activities on Hawaiian monk seals as well as other components of the marine ecosystem and human environment. Anyone having relevant information they believe NMFS should consider in its analysis should provide a description of that information along with complete citations for supporting documents.

NMFS has provided a potential proposed action and several other alternative actions in the October 1, 2010 Notice of Intent. The final scope and structure of the alternatives, to be determined at a later date, will reflect the combined input from the public, research institutions, affected State and Federal agencies, and NMFS administrative and research offices. A principal objective of the scoping and public involvement process is to determine a range of reasonable management alternatives that will identify critical issues, and provide a clear basis for distinguishing among those alternatives and selecting a preferred alternative.

Comments will be accepted during the scoping period through November 30, 2010. We request that you include in your comments: (1) Your name, address, and affiliation (if any); and (2) Any relevant background documents to support your comments.

Dated: November 5, 2010.

**Samuel D. Rauch III,**

*Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Evaluation of State Coastal Management Programs and National Estuarine Research Reserves

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Office of Ocean and Coastal Resource Management, National Ocean Service, Commerce.

**ACTION:** Notice of intent to evaluate and notice of availability of final findings.

**SUMMARY:** The NOAA Office of Ocean and Coastal Resource Management (OCRM) announces its intent to evaluate the performance of the Louisiana Coastal Resources Management Program and the Jobos Bay (Puerto Rico), Rookery Bay (Florida), and Chesapeake

Bay (Maryland) National Estuarine Research Reserves.

The Coastal Zone Management Program evaluation will be conducted pursuant to section 312 of the Coastal Zone Management Act of 1972, as amended (CZMA) and regulations at 15 CFR part 923, subpart L. The CZMA requires continuing review of the performance of states with respect to coastal program implementation. Evaluation of a Coastal Management Program requires findings concerning the extent to which a state has met the national objectives, adhered to its Coastal Management Program document approved by the Secretary of Commerce, and adhered to the terms of financial assistance awards funded under the CZMA.

The National Estuarine Research Reserve evaluations will be conducted pursuant to sections 312 and 315 of the CZMA and regulations at 15 CFR part 921, subpart E and part 923, subpart L. Evaluation of a National Estuarine Research Reserve requires findings concerning the extent to which a state has met the national objectives, adhered to its Reserve final management plan approved by the Secretary of Commerce, and adhered to the terms of financial assistance awards funded under the CZMA.

Each evaluation will include a site visit, consideration of public comments, and consultations with interested Federal, state, and local agencies and members of the public. A public meeting will be held as part of the site visit. When the evaluation is completed, OCRM will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings. Notice is hereby given of the dates of the site visits for the listed evaluations, and the dates, local times, and locations of the public meetings during the site visits.

**Dates and Times:** The Louisiana Coastal Resources Management Program evaluation site visit will be held January 3–7, 2011. One public meeting will be held during the week. The public meeting will be held on Monday, January 3, 2011, at 6:30 p.m. in the Griffon Room, LaSalle Building, Capitol Complex, 617 North 3rd Street, Baton Rouge, Louisiana.

The Jobos Bay (Puerto Rico) National Estuarine Research Reserve evaluation site visit will be held January 24–28, 2011. One public meeting will be held during the week. The public meeting will be held on Tuesday, January 25, 2011, at 5 p.m. at the Jobos Bay National Estuarine Research Reserve Visitors' Center, Road 705, Kilometer 2.3, Main Street, Aguirre, Puerto Rico.

The Rookery Bay (Florida) National Estuarine Research Reserve evaluation site visit will be held January 24–28, 2011. One public meeting will be held during the week. The public meeting will be held on Wednesday, January 26, 2011, at 6:30 p.m. at the Rookery Bay National Estuarine Research Reserve Environmental Learning Center, 300 Tower Road, Naples, Florida.

The Chesapeake Bay (Maryland) National Estuarine Research Reserve evaluation site visit will be held January 24–28, 2011. One public meeting will be held during the week. The public meeting will be held on Tuesday, January 25, 2011, at 7 p.m. at the McCann Center, Jug Bay Wetlands Sanctuary, 1361 Wrighton Road, Lothian Maryland.

**ADDRESSES:** Copies of the states' most recent performance reports, as well as OCRM's evaluation notification and supplemental information request letters to the state, are available upon request from OCRM. Written comments from interested parties regarding these Programs are encouraged and will be accepted until 15 days after the public meeting held for a Program. Please direct written comments to Kate Barba, Chief, National Policy and Evaluation Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1305 East-West Highway, 10th Floor, N/ORM7, Silver Spring, Maryland 20910, or [Kate.Barba@noaa.gov](mailto:Kate.Barba@noaa.gov).

**SUPPLEMENTARY INFORMATION:** Notice is hereby given of the availability of the final evaluation findings for the Rhode Island Coastal Management Program (CMP) and the Tijuana River (California), Padilla Bay (Washington), and North Carolina National Estuarine Research Reserves (NERRs). Sections 312 and 315 of the Coastal Zone Management Act of 1972 (CZMA), as amended, require a continuing review of the performance of coastal states with respect to approval of CMPs and the operation and management of NERRs.

The State of Rhode Island was found to be implementing and enforcing its federally approved coastal management program, addressing the national coastal management objectives identified in CZMA Section 303(2)(A)–(K), and adhering to the programmatic terms of its financial assistance awards. The Tijuana River, Padilla Bay, and North Carolina NERRs were found to be adhering to programmatic requirements of the NERR System.

Copies of these final evaluation findings may be obtained upon written request from: Kate Barba, Chief, National Policy and Evaluation Division, Office of Ocean and Coastal

## Hawaiian Monk Seal Recovery Actions Programmatic Environmental Impact Statement

This newsletter is the first in a series of four newsletters regarding the Hawaiian Monk Seal Recovery Actions Programmatic Environmental Impact Statement (PEIS). It is being mailed to federal, state, and local agencies; elected and appointed officials; Native Hawaiian groups; other interested organizations; and individual citizens within or adjacent to the project area to inform people about the National Environmental Policy Act (NEPA) process and to request scoping comments. This and subsequent newsletters can be found on the project website: <http://www.nmfs.noaa.gov/pr/permits/eis/hawaiianmonkseal.htm>. The purpose of this newsletter is to invite you to participate in the public scoping comment process and provide some background information on the Hawaiian Monk Seal Recovery Actions PEIS.

### Scoping Meetings Announced

The National Marine Fisheries Service (NMFS) Pacific Islands Regional Office is preparing a PEIS to assess the impacts of implementing specific management actions and administering a research and enhancement program to improve survival of Hawaiian monk seals (*Monachus schauinslandi*) in the Northwestern and Main Hawaiian Islands.

Publication of the Notice of Intent was published in the *Federal Register* on October 1, 2010, which began the official 45-day scoping period for this PEIS. Scoping is a part of the NEPA process that invites affected and interested people, agencies, and groups to help:

- identify concerns about the proposed action;
- define a range of alternatives;
- determine and define the scope of issues to be examined;
- identify other environmental and consultation requirements;
- identify related environmental documents being prepared; and
- identify potentially interested parties.

The scoping comment deadline is November 15, 2010.

# In the News

## What is NEPA?

NEPA requires federal agencies (such as NMFS) to consider and disclose the potential consequences of its decisions on the human environment before deciding to proceed with a proposed action.

A range of reasonable alternatives, including an alternative considering no action as required by NEPA, will be developed and analyzed in the PEIS. The alternatives must address the requirements of NEPA as well as the legal, regulatory, and budgetary parameters that govern the research and enhancement (for example, the Endangered Species Act [ESA]). Through scoping and subsequent discussions, the public will assist in developing the alternatives to be addressed in the PEIS process.

The potential impacts of the alternatives will be assessed and the results of the analyses will be documented in the Draft PEIS, which the public will have an opportunity to review. Comments on the Draft PEIS received from agencies and the public will be considered and incorporated, as applicable, into the Final PEIS.

During preparation of this PEIS, the public and interested groups and agencies will have an opportunity to:

- understand the requirements for NEPA compliance;
- make recommendations on how recovery activities should be conducted; and
- review decision-making options for management, research and enhancement by NMFS.

The PEIS process is scheduled for completion in late 2011.

## Why is a PEIS needed?

The intent of this PEIS is to evaluate, in compliance with NEPA, the potential direct, indirect, and cumulative impacts on the human environment of the proposed activities under the Hawaiian monk seal recovery program.

## Steps in the NEPA Process

\*indicates steps where there is an opportunity to provide public input

## Project Description

NMFS is the federal agency responsible for management of Hawaiian monk seals under the ESA and the Marine Mammal Protection Act (MMPA). NMFS currently funds, authorizes, and conducts research and enhancement activities on Hawaiian monk seals in the Northwestern Hawaiian Islands and Main Hawaiian Islands. In 1976, NMFS listed Hawaiian monk seals as “endangered” under the ESA and “depleted” under the MMPA. A Recovery Plan was developed by NMFS for the species in 1983 and revised in 2007. Under this plan, there are funds designated and allocated to NMFS for the purpose of promoting Hawaiian monk seal recovery. NMFS administers these funds, issues permits, and implements recovery actions that include research and enhancement activities (for example, population counts, tagging, and tissue sampling).

## Public Scoping Meeting Schedule

Honolulu, O'ahu  
Wednesday, October 20, 2010; 5:30 pm - 8:30 pm

*Central Union Church  
1660 South Beretainia St.*

Hilo, Hawai'i  
Thursday, October 21, 2010; 6 pm - 9 pm

*Mokupāpapa Discovery Center  
308 Kamehameha Ave., Ste 109*

Kihei, Maui  
Monday, October 25, 2010; 6 pm - 9 pm

*NOAA Sanctuaries New Community Learning  
Center  
726 South Kihei Rd.*

Kaunakakai, Moloka'i  
Tuesday, October 26, 2010; 6 pm - 9 pm

*Hale Mahaolu Home Pumehana  
290 Kolapa Pl.*

Līhu'e, Kaua'i  
Wednesday, October 27, 2010; 6 pm - 9 pm

*Wilcox Elementary School  
4319 Hardy St.*

are starving, pups are being killed by sharks, seals are getting entangled in marine debris, and sea level rise threatens terrestrial habitats. Low juvenile survival over the past two decades is the primary cause of the population's decline, and the population decline will likely continue without intervention. Enhancement activities, including but not limited to translocating seals from areas of lower to higher survival, are being considered to improve juvenile survival and the overall health of the population.

A comprehensive research program enables NMFS to recognize, and possibly quantify, factors limiting the population in order to designate appropriate actions to minimize impacts of human-induced activities and other factors affecting Hawaiian monk seal survival. Data and analyses derived from research lead to improved decision-making, and strategic management and enhancement activities that promote population recovery, prevent harm and avoid jeopardy or continued disadvantage to the species. Research and monitoring will continue to play a key role in determining whether enhancement activities achieve their desired outcomes.

### Purpose and Need for Management Actions and Research and Enhancement Activities

The purpose of this proposed action is to assure the long-term viability of the Hawaiian monk seals in the wild, allowing initially for reclassification to threatened status and, ultimately, removal from the List of Endangered and Threatened Wildlife under the ESA. The Hawaiian monk seal population has experienced a prolonged decline and currently only approximately 1,200 monk seals remain.

Numerous threats to the survival of Hawaiian monk seals are identified in the 2007 Hawaiian Monk Seal Recovery Plan. In the Northwestern Hawaiian Islands, young seals

### How can I participate in the process?

#### *Public Scoping Meetings*

There are several opportunities to participate in the PEIS process. Five public scoping meetings will be held to present information to the public and obtain input. Dates for the public scoping meetings are provided in this newsletter and will be announced in newspapers and the project website at <http://www.nmfs.noaa.gov/pr/permits/eis/hawaiianmonkseal.htm>.

There will be an open house for the first 30 minutes of each meeting followed with a presentation to describe the project and process. An opportunity for questions, answers, and oral comments will be given after the presentation.

The public scoping comment period will be open until November 15, 2010. Comments may be submitted at the public scoping meetings verbally and/or in writing, or outside of the public scoping meetings by e-mail, fax, or by letter to the address provided at the end of this newsletter.

Your comments are important to us; particularly at this early stage of the process.

### *Other Ways to Participate*

The pre-addressed comment form accompanying this newsletter can be used to submit written comments at any time during the scoping period. Comments received from the public during scoping will be reviewed and incorporated, as applicable, in the PEIS.

Once the Draft PEIS is complete, the document will be released to the public to review for a period of 60 days. During the review period, NMFS will conduct public hearings to accept comments on the Draft PEIS document. Public testimony and written or e-mailed comments will be accepted during this period.

NMFS will maintain a mailing list throughout the process. Newsletters will be distributed to those on the mailing list. If you need additional information about the project, have any questions, or are interested in being added to or removed from the project mailing list please contact Jeff Walters, the NMFS Project Manager for the PEIS by mail or e-mail listed below. Please submit your written comments regarding the PEIS to:

National Marine Fisheries Service  
Pacific Islands Regional Office  
Hawaiian Monk Seal Recovery Actions PEIS  
1601 Kapiolani Blvd., Ste. 1110  
Honolulu, HI 96814  
e-mail: [monkseal@noaa.gov](mailto:monkseal@noaa.gov)  
website: <http://www.nmfs.noaa.gov/pr/permits/eis/hawaiianmonkseal.htm>

In 2009, 113 seals were individually identified in the main Hawaiian Islands, based on flipper tag ID numbers or unique natural markings. Including seals that have not been individually identified, NMFS researchers estimate the total number of monk seals in the main Hawaiian Islands is at least 150.

### Where do monk seals go to find food?

Monk seals hunt for food outside the immediate shoreline areas, primarily in the region that is 60-300 feet deep. If fishermen are throw-netting or shore-casting, they will likely not be fishing in the area where the monk seals feed. However, monk seals and fishermen do, on rare occasion, use the same areas. This usually happens along the shoreline as seals leave to or return from feeding. Seals have also been known to eat catch from nets, and bait from fishing hooks. When this happens the seals can become a nuisance. Seals may eat fish and bait because they are "opportunistic feeder." This means that they will feed on a food source if it is "easy" for them to get. They learn these habits quickly. Ultimately this behavior is bad for both seals and fishermen.

For more information on Hawaiian monk seals, including recommendations to reduce monk seal interactions with fishing gear, please view the FAQ sheet titled "FAQ: How to prevent seals from getting your fish and bait," available for download at the following website: [http://www.fpir.noaa.gov/PRD/prd\\_hawaiian\\_monk\\_seal.html](http://www.fpir.noaa.gov/PRD/prd_hawaiian_monk_seal.html).

National Marine Fisheries Service
Notice of Public Scoping Meetings
Programmatic Environmental Impact Statement for Hawaiian Monk Seal Recovery Actions

NOAA's National Marine Fisheries Service (NMFS), Pacific Islands Regional Office is proposing to implement specific management actions and administer the associated research and enhancement program for Hawaiian monk seals in the Hawaiian Islands. The public scoping meetings provide an opportunity to express your views and identify issues to be addressed in the Programmatic Environmental Impact Statement (PEIS). In accordance with the National Environmental Policy Act (NEPA), NMFS requests any comments you may have about potential management actions and associated research and enhancement program activities that may be performed on Hawaiian monk seals in an effort to recover the species. Five public scoping meetings will be held in the following locations (the first 30 minutes will be an open house):

Honolulu, O'ahu
Central Union Church 1660 South Beretania Street
Wednesday, October 20, 2010; 5:30 pm - 8:30 pm

Hilo, Hawai'i
Mokupapapa Discovery Center
308 Kamehameha Avenue, Suite 109
Thursday, October 21, 2010; 6 pm - 9 pm

Kihei, Maui
NOAA Sanctuaries New Community Learning Center
726 South Kihei Road
Monday, October 25, 2010; 6 pm - 9 pm

Kaunakakai, Moloka'i
Hale Mahaolu Home Pumehana
290 Kolapa Place
Tuesday, October 26, 2010; 6 pm - 9 pm

Lihu'e, Kaua'i
Wilcox Elementary School
4319 Hardy Street
Wednesday, October 27, 2010; 6 pm - 9 pm

The Notice of Intent was published in the Federal Register on October 1, 2010 and a link to it can be found on the project website at: http://www.nmfs.noaa.gov/pi/permits/eis/hawaiianmonkseal.htm. Scoping comments can be submitted in writing and mailed to NMFS Pacific Islands Regional Office, Hawaiian Monk Seal Recovery Actions PEIS at 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814 or e-mailed to monkseal@noaa.gov.

THE DEADLINE FOR PROVIDING COMMENTS IS NOVEMBER 15, 2010. (SA243381 10/6, 10/13/10 MW 10/13/10, MWK 10/13, 10/20/10)

Hiki No. After a half-hour or so of trolling, I look back to see a good sized Mahi doing its dance, and Kamauliola is cheering as he watches it go airborne. The fish turned out to be a stubborn one and did all its tricks, including jumping over ten times and also going down deep. I just took my time and tired it out so it wouldn't go ballistic when it got in the boat. After getting the fish all iced down in the fishbag, he said "we got fish, let's go already." This Bull Mahimahi weighed in at 31.5 lbs!

My commission expires October 1, 2012

Page(s): 1

**National Marine Fisheries Service  
Extension of Scoping Comment Period  
Programmatic Environmental Impact Statement for Hawaiian  
Monk Seal Recovery Actions**

The National Oceanic Atmospheric Administration (NOAA), National Marine Fisheries Service (NMFS), Pacific Islands Regional Office (PIRO) is proposing to implement specific management actions and administer the associated research and enhancement program for Hawaiian monk seals in the Hawaiian Islands. Public comments were due by November 15, 2010. NMFS has decided to allow additional time for submission of public comments on this action. **The scoping period for the PEIS is extended to November 30, 2010. Written comments must be received or postmarked by November 30, 2010.**

The Scoping period provides an opportunity to express your views and identify issues to be addressed in the Programmatic Environmental Impact Statement (PEIS). In accordance with the National Environmental Policy Act (NEPA), NMFS requests any comments you may have about potential management actions and associated research and enhancement program activities that may be performed on Hawaiian monk seals in an effort to recover the species.

The Notice of Intent was published October 1, 2010 (75 FR 60721), which initiated the formal PEIS Scoping period. NMFS PIRO hosted public Scoping meetings to introduce the project proposal to the public, describe the process of the PEIS, and solicit input on the issues and alternatives to be evaluated. Public Scoping meetings were held at the following locations: October 21, 2010 - Honolulu, Oahu; October 22, 2010 - Hilo, Island of Hawaii; October 25, 2010 - Kihei, Maui; October 26, 2010 - Kaunakakai, Molokai; and October 27, 2010 - Lihue, Kauai. **No additional Scoping meetings will be held.**

# Molokai Dispatch

Molokai news, Molokai Style Since 1985

To Whom It May Concern:,

I, Kathleen Templeton, certify that the advertisements for ERM, listed under National Marine Fisheries Service, were placed in The Moloka'i Dispatch on Nov 17 & 24, 2010 as 1/8 page black & white ads. Please reference the tear sheets as proof of publication and the attached receipt #3545 for more information.

If there are any questions or concerns please feel free to contact our Sales Manager at 808.450.6218.

Sincerely,

Kathleen Templeton

Subscribed and sworn to before me this

## Scoping Meeting for the Hawaiian Monk Seal Recovery Actions Programmatic Environmental Impact Statement

### Who is NMFS?

The National Marine Fisheries Service (NMFS) is a federal agency that is responsible for protecting and improving survival of Hawaiian monk seals as required by two laws – the Endangered Species Act and the Marine Mammal Protection Act.

### What is a Hawaiian monk seal?

A Hawaiian monk seal is an endangered species that lives only throughout the Northwestern Hawaiian Islands (NWHI) and the Main Hawaiian Islands (MHI). Hawaiian monk seals existed for about 10 million years and they are the only warm water tropical seals.

### How many Hawaiian monk seals are there and why is the population declining?

Only about 1,100 - 1,200 Hawaiian monk seals remain and the population is declining by 4 percent each year. The population is declining because there is:

- Low juvenile (less than 3 years old) survival due to starvation, shark predation, and entanglement
- Few maturing females, so fewer pups are born
- Low birth rate

### What is “Scoping” and what is the purpose of this “Scoping” Meeting?

“Scoping” is the part of the National Environmental Policy Act (NEPA) process that gives you a chance to share your thoughts, concerns, and comments with NMFS. By sharing this with NMFS, they can know what is specifically important to address when they move onto the next step in the NEPA process.

Objectives of this meeting are:

- Provide information on why Hawaiian monk seals are declining and what NMFS is considering to do about it
- Review the purpose and need for the Programmatic Environmental Impact Statement (PEIS)
- Identify issues and potential alternatives that should be considered in the PEIS
- Provide an opportunity for public comments on this process

### This PEIS...

- WILL NOT result in any new regulations (for example, on fishing or public access)
- WILL NOT result in new closure areas or restrictions
- WILL evaluate the potential effects of proposed activities (such as translocation and vaccinations) on Hawaiian monk seals, other marine mammals, fish, and wildlife, cultural resources, and socioeconomics.

# Hawaiian Monk Seal PEIS

## What is NMFS proposing to do?

NMFS is proposing research and enhancement activities to help improve Hawaiian monk seal survival so they will no longer be considered endangered. This action requires NMFS to prepare a PEIS.

## Why does this need to be done?

Purpose:

- Promote the long-term viability of the Hawaiian monk seals in the wild
- Allow for reclassification to threatened status and, ultimately, removal from listing under the Endangered Species Act

Need:

- To help slow the decline in Hawaiian monk seal populations and supplement the population in the NWHI

## Why is NMFS preparing a PEIS?

NMFS is preparing a PEIS to meet the requirements of NEPA. This law requires that when there is a major federal action, the agency making the action must consider and disclose the impacts to the human environment. Issuing funds and/or a permit to do research or enhancement activities on an endangered species is considered a “major federal action.” NMFS is preparing this document to look at a range of activities that could be done to help Hawaiian monk seals increase their total population to a point where they are no longer considered an “endangered species.”

## Alternatives

Possible themes that have been identified for alternatives are presented in the table below. The scoping process will help finalize the scope and structure of the alternatives.

	Alternative 1 (No Action; Current Permit Expires in 2014)	Alternative 2 (Status Quo)	Alternative 3 (Enhanced Implementation / Proposed Action)
Research and Enhancement Activities	<p>No new activities authorized after permit expires in 2014.</p> <p><i>(NMFS ESA-MMPA Permit No. 10137-04 issued to NMFS Pacific Islands Fisheries Science Center)</i></p>	<ul style="list-style-type: none"> <li>• Population assessment (e.g., counting, resighting, marking for identification, flipper tags);</li> <li>• Health and disease studies (e.g., tissue sampling, morphometric measurements);</li> <li>• Foraging studies (e.g., telemetry, scat collection);</li> <li>• De-worming research (e.g., fecal samples, testing anti-parasite treatments);</li> <li>• Translocation of weaned pups within the NWHI to improve juvenile survival;</li> <li>• Mitigation of fishery interactions (e.g., disentanglement, removal of fishing hooks); and</li> <li>• Mitigation of adult male aggression (e.g., removal and relocation of aggressive males).</li> </ul>	<p>Existing and additional activities would include, but are not limited to:</p> <ul style="list-style-type: none"> <li>• Vaccination studies (including potential vaccination);</li> <li>• De-worming;</li> <li>• Archipelago-wide translocations to improve juvenile survival; and</li> <li>• Behavioral modification (developing aversive conditioning tools to discourage undesirable seal behavior in the MHI, such as interactions with humans or domestic animals).</li> </ul>

### Behavioral Modification

Why?

- Keep wild seals wild
- Prevent undesirable interactions between seals and people
- Foster a more natural seal/human co-existence

NMFS is considering...

- Strategically moving some recently weaned pups to prevent them from becoming socialized to humans
- Research on how to modify seal behavior
- Developing tools to manage seal behavior

### Seal Translocation

Why?

- Improve female survival and bolster NWHI populations
- Maintain natural trend in MHI

Steps in the process (NWHI -> MHI -> NWHI given current trends)

1. Identify female weaned seal pups in NWHI to be moved

2. Take them to MHI and release amongst wild population
3. Manage and monitor seals while in MHI
4. Return seals to NWHI when 3+ years old
5. Monitor returned seals in NWHI to evaluate program success

Key Points

- Phased-in process – start with small numbers, continue only if successful
- Starting in 2012 – at the earliest

### Project Schedule

- Notice of Intent – published October 1, 2010
- Scoping Period – October 1 – November 15, 2010
- Scoping Meetings – October 20 – 29, 2010
- Draft PEIS published – Spring 2011
- Public Comment Period on Draft PEIS (minimum 45-days) – Spring/Summer 2011
- Public Hearings – Summer 2011
- Final PEIS published – Fall 2011
- Record of Decision – Early 2012

Project Area

### How can I make my comments count?

When making comments, it is helpful to consider some of the following questions and points:

- How do you think research and enhancement activities on Hawaiian monk seals would impact you and what you do?
- What do you like, and what do you not like about NMFS conducting research and enhancement activities on Hawaiian monk seals?
- Give ideas about how to address the Hawaiian monk seal's population decline.
- Give ideas about how to mitigate (lessen or avoid) impacts to you that might be caused by research and enhancement activities.
- Give reference to, or attach any supporting data, reports, studies, etc.

We welcome any other thoughts, concerns, or insights you might have regarding permitting recovery actions for Hawaiian monk seals.

### Scoping Meeting Procedures

Please sign up to speak at the registration desk if you have not already done so. After a brief presentation public comments will begin. Speakers will be called in the order they signed in and unregistered speakers will follow.

When providing verbal comment:

- State your name and affiliation (if any)
- Stay within the time limit, additional time as schedule allows

Please leave written comments or additional materials with project team staff.

*\*Comments are being recorded by project team staff*

### General Ground Rules of the Meeting

- Please make sure pagers and cell phones are off or on vibrate
- Please have mutual respect—please allow others their turn to speak without interruptions
- Please stay within designated time limits
- Please take private conversations outside this meeting room.

### For More Information

If you need more information after tonight please feel free to:

Visit the project website at: <http://www.nmfs.noaa.gov/pr/permits/eis/hawaiianmonkseal.htm> or contact project team staff:

Jeff Walters  
Project Manager & Hawaiian Monk Seal Recovery  
Coordinator  
1601 Kapiolani Blvd., Ste. 1110  
Honolulu, HI 96814  
e-mail: [monkseal@noaa.gov](mailto:monkseal@noaa.gov)

### Providing Comments After Tonight

If you do not feel comfortable giving your comments verbally tonight or if you want to take some more time to put your comments together, you may submit written comments, and mail to the project address, submit via e-mail, or leave the comment with project staff tonight. Pre-addressed comment forms are available at the registration desk.

## How to Prevent Seals from Getting Your Fish and Bait

**What can you do to minimize the possibility of a seal eating your catch or stealing your bait?**

### **1. Don't feed the seals or discard old bait or scraps into the water if seals are in the area.**

One might assume that feeding a seal, or letting it have your old bait and scraps, would keep it satisfied and uninterested in the fish in your net or on your hook - but this is not the case. A seal that has been fed will actually seek out humans because it will learn to associate humans with food and, as a result, become conditioned to not hunt on its own. A seal known as R042 displayed this conditioning response after being fed by spear fishers as a pup. When she got older, she began biting divers, whom she saw as a source for food, and became a public safety hazard. Eventually this seal had to be relocated away from the main Hawaiian Islands.

### **2. If you encounter a seal while fishing take a short break or change locations.**

Seals are curious creatures and investigate everything. Taking a short break from fishing while they are passing through your immediate area may allow them to move through quickly. Another option is to change your fishing location. Boat based spearfishers should keep their catch out of the water when seals are in the area and shore based spearfishers should attempt to do the same if possible. Additionally spearfishermen should not feed the seals or allow them to take their catch whenever possible. If a seal starts acting aggressively towards yourself or your catch it may be advisable to end the dive or change locations due to safety considerations.

### **3. Use a barbless circle hook.**

Barbless hooks help minimize post-hooking injuries to seals and can still be used with live bait. To learn how to bridle live bait to a barbless hook, visit the Barbless Hook Project website: [http://www.fpir.noaa.gov/RCF/barbless\\_hook.html](http://www.fpir.noaa.gov/RCF/barbless_hook.html)

# Hawaiian Monk Seal

## Relocations to the Main Hawaiian Islands

### **Q: Were Hawaiian monk seals ever brought to the main Hawaiian Islands (MHI) from the Northwestern Hawaiian Islands (NWHI)?**

A: Yes. In July and August of 1994, 21 adult male Hawaiian monk seals (*Monachus schauinslandi*) were relocated from Laysan Island in the NWHI to the MHI because males greatly outnumbered females on Laysan Island, creating an unbalanced population. Additionally, some males were injuring and killing female seals. To prevent the further loss of females, it was necessary to remove some of the male seals from the island. Males were selected if they were known aggressors or behaved like aggressors. This is the only known case where seals were taken from the NWHI and released in the MHI. All other seals in the MHI arrived here naturally or were born here.

### **Q: Were any female seals ever relocated from the NWHI to the MHI?**

A: No. All female Hawaiian monk seals in the MHI occur here naturally – only males were relocated from the NWHI in 1994.

### **Q: Is the relocation of males in 1994 the reason why the monk seal population has been growing in the MHI?**

A: No. Before 1994, there was a small naturally-occurring population of male and female monk seals in the MHI. This population appeared to be growing, and at least six pups had been born by 1994 (one in 1962, and five between 1988 and 1993). The relocation is not the source of the MHI seal population and does not represent a contribution to the long term growth of the population because there were already males present that could mate with the females.

**NOAA  
FISHERIES  
SERVICE**

*Science, Service, Stewardship*

May 2010

**Q: Why is the monk seal population in the MHI growing?**

A: The population is growing naturally. The number of monk seals that are born in the MHI has increased since the mid-1990s. In 2008 and 2009 there were 18 and 15 pups born, respectively, within the MHI. These pups “wean” (become independent from their mother’s milk) at larger and healthier sizes in the MHI than in the NWHI, allowing them a greater chance for survival. Also, certain threats to monk seals in the NWHI, such as shark predation of pups and entanglement in marine debris, are not as severe in the MHI. It appears that Hawaiian monk seals are beginning to settle back in the MHI, where it is thought they once lived long ago.

**Q: Are the seals that were relocated in the MHI still around today?**

A: The number of relocated males is decreasing with time as they age and ultimately die of natural causes. In 2008, only five of the 21 relocated seals were still remaining, representing about 6% of the 88 known individual seals in the MHI.

**Q: Are there plans for relocating any other monk seals from the NWHI to the MHI?**

A: There are currently no plans to relocate seals from the NWHI to the MHI, but if necessary, relocation could be considered in the future to avoid extinction of the species.

# Hawaiian Monk Seal

## Population and Location

### **Q: How many monk seals are alive today?**

A: The current estimated total is 1,100-1,200 seals.

### **Q: Where do Hawaiian monk seals live?**

A: Most Hawaiian monk seals live in the Northwestern Hawaiian Islands (NWHI), with a small population in the main Hawaiian Islands (MHI).

### **Q: How many monk seals live in the MHI?**

A: In 2009, 113 seals were individually identified in the MHI, based on flipper tag ID numbers or unique natural markings. Including seals that have not been individually identified, NMFS researchers estimate the total number of monk seals in the MHI is at least 150.

### **Q: Are there more Hawaiian monk seals in the MHI today than there were in the past?**

A: Reliable information about the monk seal population in the MHI prior to the 1980's is very limited. Data starting in the 1980's indicate the MHI seal population is growing naturally. Annual monk seal births in the MHI have increased significantly, especially since the mid-1990s. Excluding Niihau, there were 18 and 15 pups born within the MHI in 2008 and 2009, respectively. It is possible that Hawaiian monk seals are beginning to settle back in the MHI, where they once lived long ago. Monk seals seem to be doing well in the MHI despite the relatively high human population. This may be because female seals usually choose remote shoreline areas to give birth. Only a few females have given birth on popular public beaches. There is a misconception that monk seals have been increasing in the MHI because they have been transported by humans or traveled on their own from the NWHI. No one has transferred monk seals to the MHI from the NWHI since 1994. During that year, 21 male monk seals, and no females, were relocated from the NWHI to the MHI. Over time, the number of these relocated seals has naturally decreased as they age, and only four of these seals have been recently observed and reported. Research has also shown that the monk seals rarely migrate from the NWHI to the MHI.

May 2010

Kauai: 30-40  
Oahu: 30-40  
Molokai: 30-40  
Maui/Lanai: 5-10  
Big Island: 5-10

### Identified seals visiting island each year (seals often visit multiple islands)

**Q: On what island do most of the Hawaiian monk seals live?**

A: Monk seals have been seen on all the MHI. The largest number is likely on Niihau since it is more remote and has less human impact. However, there has not been an official count done on that island. Generally, the number of monk seal sightings tends to increase moving northwest along the island chain and closer to the larger population in the NWHI.

# Hawaiian Monk Seal

## The Hawaiian Monk Seal's Diet

### Q: What do Hawaiian monk seals eat?

A: Hawaiian monk seals generally do not eat just one kind of prey. They eat a variety of fish species ranging from the reef to the depths of over 1,500 feet. They also eat squid, octopus, eels, and several types of crustaceans (crabs, shrimp, and lobster).

### Q: Where do monk seals go to find food?

A: Monk seals hunt for food outside the immediate shoreline areas, primarily in the region that is 60-300 feet deep. If fishermen are throw-netting or shore-casting, they will likely not be fishing in the area where the monk seals feed. However, monk seals and fishermen do, on rare occasion, use the same areas. This usually happens along the shoreline as seals leave to or return from feeding. Seals have also been known to eat catch from nets, and bait from fishing hooks. When this happens the seals can become a nuisance. Seals may eat fish and bait because they are "opportunistic feeders." This means that they will feed on a food source if it is "easy" for them to get. They learn these habits quickly. Ultimately this behavior is bad for both seals and fishermen.

### Q: Are ulua and papio a main food source of the Hawaiian monk seal?

A: No. Diet studies indicate that they prefer prey that is easier to catch.

### Q: Are monk seals eating our fish and decreasing fish stocks?

A: It is unlikely that the small number of seals that live in the main Hawaiian Islands would have a great impact on the local fish populations. We know that they feed over wide areas and eat a wide variety of prey including squid, octopus, eels, crustaceans, and fish. Their impact is limited.

### Q: Why are monk seals so fat?

A: Monk seals in the main Hawaiian Islands are naturally fat because they are very good hunters. They typically eat about 3% to 8% of their body weight per day (depending on age/maturity) and they store the excess energy from their prey in the form of fat. This fat is important to provide nutrients when they fast during nursing or molting.

# Hawaiian Monk Seal

## Critical Habitat in the Main Hawaiian Islands

### Q: What is critical habitat?

A: Critical habitat is a specific area, or areas, that are essential to an endangered or threatened animal or plant in order for it to survive, not go extinct and recover to a healthy population.

This area(s):

- may require special management, like protection from development;
- may include an area that the species is not currently using, but will need to use as its population grows and recovers; and
- is only officially designated after a public comment period.

### Q: Is critical habitat similar to a Marine Protected Area (MPA), Marine Life Conservation District (MLCD), Shoreline Fisheries Management Area (SFMA), sanctuary, reserve, refuge, park, or wilderness area?

A: No. Designation of critical habitat does NOT restrict public access.

### Q: Will I still be able to recreate in beach areas that have been designated as critical habitat for the Hawaiian monk seal?

A: Yes. A critical habitat designation will not impact access to, and recreation on, the public beaches of Hawaii.

### Q: Will I still be able to fish in an area that has been designated as critical habitat for the Hawaiian monk seal?

A: Yes. A critical habitat designation only affects Federal activities (those that are federally authorized, carried out or funded). This means that any fishing within State waters (3 miles or less from shore) will not be affected by critical habitat designation.

### Q: Can private developments still occur in an area that has been designated as critical habitat?

A: Yes. The only developments that may be affected are those activities requiring Federal funding or authorization, such as filling of a wetland or repair of a seawall. This precaution is in place to insure that Federal agencies do not destroy or adversely modify critical habitat through development or other activities.

### Q: If Hawaiian monk seal critical habitat is designated, when would that happen?

A: Currently NOAA Fisheries is working towards a proposed rule for the revision to critical habitat for the Hawaiian monk seal. Through this process NOAA will be reviewing all current information available and analyzing any impacts that may result from a critical habitat designation. All of this information will be available to the public for comment when the proposed rule is announced. Critical habitat is not in effect until the final rule. The final rule is usually determined a year after the proposed rule when all comments have been received and evaluated.

### Q: What is the next step in the process of revising monk seal critical habitat?

A: The next step in the process is the publication of a proposed rule describing the revision of monk seal critical habitat, which will be followed by a public comment period and public meetings.

**NOAA  
FISHERIES  
SERVICE**

*Science, Service, Stewardship*

May 2010

**Activities NOT affected by critical habitat:**

**Non-Federal activities on private land, such as:**

- Construction
- Farming
- Logging
- ATV use
- Hunting

**Non-Federal activities on non-Federal public land or water, such as:**

- Beach recreation
- Walking the dog
- Hunting
- Ocean recreation in State waters
- Shoreline and lay gillnet fishing in State waters
- Boating & jet-skis in State waters
- Operation of tour vessels in State waters

Dear Sir/Madam:

The National Oceanic and Atmospheric Administration, National Marine Fisheries Service (NMFS), Pacific Islands Regional Office is beginning to prepare a Programmatic Environmental Impact Statement (PEIS) on a proposed research and enhancement program to improve juvenile survival of Hawaiian monk seals (*Monachus schauinslandi*). NMFS will be the lead agency in preparing the PEIS in accordance with the National Environmental Policy Act (NEPA). The purpose of this letter is to invite you and your agency to participate in the PEIS process and to provide some background information on Hawaiian monk seal research and enhancement. Please see the enclosed document for additional background information. NMFS recognizes the knowledge and expertise within your agency and welcomes your participation in this effort.

The process of preparing the PEIS formally began with publication of the Notice of Intent to prepare the PEIS in the Federal Register on October 1, 2010. The process is tentatively scheduled to be completed by December 2011. Public scoping meetings will be held October 20-27, 2010, in Honolulu, Hilo, Kihei, Kaunakakai, and Lihue. We also will be holding an additional scoping meeting specifically for government agencies and we would like to invite you and/or your representative to attend this meeting. The purpose of the agency scoping meeting is to brief you on preparation of the PEIS and to solicit your agency's comments and suggestions. The meeting will be held on October 20, 2010, from 10:00 to 11:00 a.m., at our offices at 1601 Kapiolani Blvd., Suite 1110. In accordance with NEPA, NMFS requests any comments you may have about potential management actions and associated research and enhancement program activities that may be performed on Hawaiian monk seals in an effort to recover the species.

If you would like to participate in the PEIS agency scoping meeting, please notify Jeff Walters, our Hawaiian monk seal recovery coordinator, by phone (808-944-2235) or by e-mail ([jeff.walters@noaa.gov](mailto:jeff.walters@noaa.gov)). We would appreciate being notified by October 15, 2010. Whether or not you are able to participate in this meeting, your written comments and/or recommendations are welcome and can be sent to [monkseal@noaa.gov](mailto:monkseal@noaa.gov) or 1601 Kapiolani Boulevard, Suite 1110, Honolulu, HI 96814. Please send your scoping comments and/or recommendations no later than November 15, 2010. Please note that this invitation to the PEIS scoping meeting is in addition to our September 14, 2010 letter to you inviting your agency to participate in the PEIS process as a cooperating agency. We look forward to seeing you at the agency scoping meeting and/or to receiving your comments regarding the PEIS.

Sincerely,

Michael D. Tosatto  
Acting Regional Administrator

## Hawaiian Monk Seal Research and Enhancement Activities Programmatic Environmental Impact Statement

National Marine Fisheries Service  
Pacific Islands Regional Office  
October 1, 2010

### **Background Information**

The National Marine Fisheries Service (NMFS), Pacific Islands Regional Office (PIRO) is preparing a Programmatic Environmental Impact Statement (PEIS) in accordance with the National Environmental Policy Act (NEPA). As part of the PEIS preparation process, NMFS is soliciting scoping comments on a proposed research and enhancement program for Hawaiian monk seals (*Monachus schauinslandi*).

NMFS is the federal agency responsible for management of Hawaiian monk seals under the Endangered Species Act (ESA) (ESA; 16 U.S.C. 1531 *et seq.*) and the Marine Mammal Protection Act (MMPA) (MMPA; 16 U.S.C. 1361 *et seq.*). In 1976, NMFS listed Hawaiian monk seals as “endangered” under the ESA and “depleted” under the MMPA. As required under Section 4 of the ESA, NMFS published a Recovery Plan for the species in 1983, which was revised in 2007.

Section 7(a)(2) of the ESA, as amended (ESA; 16 U.S.C. 1531 *et seq.*), requires NMFS to ensure that any action it authorizes, funds or carries out (such as research or enhancement), is not likely to jeopardize the continued existence of any threatened or endangered species, or result in destruction or adverse modification of critical habitat. Permits for research and enhancement activities are issued by NMFS pursuant to the provisions of Section 10(a)(1)(A) of the ESA, Sections 104 (c)(3)(A) and 104 (c)(4)(A) of the MMPA, and NMFS regulations implementing these statutes.

The proposed research and enhancement program is being specifically designed to improve the survival of juvenile Hawaiian monk seals in the Northwestern Hawaiian Islands (NWHI). To achieve improved juvenile seal survival in the NWHI, the proposed program is expected to entail an integrated suite of research and enhancement activities for implementation in the NWHI and Main Hawaiian Islands. The intent of the PEIS discussed here is to evaluate, in compliance with the NEPA (40 CFR Parts 1500-1508), the potential direct, indirect, and cumulative impacts on the human environment of the proposed research and enhancement activities under the Hawaiian monk seal recovery program.

### **Purpose and Need**

NMFS is responsible for management, conservation, and protection of Hawaiian monk seal, under the ESA and the MMPA. The NMFS PIRO and NMFS Pacific Islands Fisheries Science Center (PIFSC) are responsible for implementation of the Hawaiian monk seal Recovery Plan (NMFS 2007) and the proposed action, which includes implementation of specific management actions and administering the associated research and enhancement program. The purpose of the proposed action is commensurate with the goal of the Recovery Plan to assure the long-term viability of the HMS in the wild, initially supporting a reverse in overall population decline, eventually allowing for reclassification of Hawaiian monk seals to threatened status, and ultimately, allowing for removal of the species from the List of Endangered and Threatened Wildlife.

The need for the proposed Hawaiian monk seal research and enhancement program is rooted in fundamental biological and ecological factors that are now limiting the population. The Hawaiian monk seal population has experienced a prolonged decline and currently, only around 1,200 monk seals remain. Numerous threats to the survival of Hawaiian monk seals are identified in the Recovery Plan. In the NWHI, young seals are starving, pups are being killed by sharks, seals are getting entangled in marine debris, and sea level rise threatens terrestrial habitats. Low juvenile survival is the primary cause of the population's decline over the past two decades. There is insufficient recruitment of healthy female seals into the breeding population, and the population decline will almost certainly continue without enhanced intervention. Research and enhancement activities, including but not limited to translocating seals from areas of lower to higher survival probability within the NWHI, have been tested and show promise for improving juvenile survival. Additional translocation activities are being considered, along with a suite of other research and enhancement activities, to improve juvenile survival in the NWHI and the overall health of the population.

In the Main Hawaiian Islands, incidents such as disturbance of seals on beaches, hooking and entanglement in fishing gear, and intentional killings (e.g., shootings) counteract recovery efforts. Improved public outreach and education, enforcement of federal statutes, and other actions to protect seals from harmful situations and reduce negative human/seal interactions are essential to minimize impacts in the Main Hawaiian Islands.

A comprehensive research program enables NMFS to recognize, and possibly quantify, factors limiting the population in order to designate appropriate actions to minimize impacts of human-induced activities and other factors affecting Hawaiian monk seal survival. Data and analyses derived from research lead to improved decision-making and strategic management and enhancement activities that promote population recovery, prevent harm, and avoid jeopardy or continued disadvantage to the species. Research and monitoring will continue to play a key role in determining whether enhancement activities achieve their desired outcomes.

#### Proposed Action and Possible Alternatives

The final scope and structure of the alternatives presented in the PEIS will reflect the combined input from the public, research institutions, affected State and Federal agencies, and NMFS administrative and research offices. The number and structure of the alternatives that are analyzed in the PEIS will be determined after scoping. Themes to include in the range of potential alternatives are presented here to provide a framework for your comments:

- No Action Alternative: Existing permitted research and enhancement activities would continue until expiration of the permit in 2014. Recovery Plan actions beyond 2014 would not be implemented. Currently, the existing research and enhancement activities include, but are not limited to:
  - Population assessment (e.g., counting, resighting, marking for identification, flipper tags, etc.);
  - Health and disease studies (e.g., tissue sampling, morphometric measurements, etc.);
  - Foraging studies (e.g., telemetry, scat collection, etc.);
  - De-worming research (e.g., fecal samples, testing anti-parasite treatments, etc.);

- Translocation of weaned pups within the Northwestern Hawaiian Islands to improve juvenile survival;
- Mitigation of fishery interactions (e.g., disentanglement, removal of fishing hooks, etc.); and
- Mitigation of adult male aggression (e.g., removal of aggressive males).
- Status Quo Alternative: The existing types and scope of research and enhancement activities would continue beyond 2014 under a new permit.
- Enhanced Implementation Alternative (Proposed Action): This alternative considers implementation of activities under the Status Quo, as well as additional activities to achieve more comprehensive Recovery Plan implementation and improved survival of juvenile seals in the NWHI. These additional activities include, but are not limited to:
  - Vaccination research studies (including potential vaccination of Hawaiian monk seals);
  - Aversive conditioning (e.g., develop tools to modify undesirable behavior including interaction with humans or domestic animals);
  - Archipelago-wide translocation of Hawaiian monk seals to improve juvenile survival; and
  - De-worming.

The PEIS under NMFS preparation will assess the direct, indirect, and cumulative effects of implementing the alternative approaches for research and enhancement activities on Hawaiian monk seals, as well as other components of the marine ecosystem and human environment. Anyone seeking to provide information for NMFS to consider in its analysis is requested to provide a description of that information along with complete citations for any supporting documents.

Honolulu, HI 96850-0056

Dear Dr. Mehroff:

The National Oceanic and Atmospheric Administration's (NOAA) National Marine Fisheries Service (NMFS) is planning to prepare a Programmatic Environmental Impact Statement (PEIS) regarding implementation of various research and enhancement activities designed to improve survival of Hawaiian monk seals (HMS) in the Northwestern Hawaiian Islands (NWHI). As you are aware, the NMFS Pacific Islands Regional Office (PIRO) and NMFS Pacific Islands Fisheries Science Center (PIFSC) are responsible for HMS recovery and research under the Endangered Species Act (ESA) (16 United States Code [U.S.C.] 1531 et seq.) and the Marine Mammal Protection Act (MMPA) (16 U.S.C. 1361 et seq.).

The PEIS, in compliance with the National Environmental Policy Act (NEPA) (40 CFR Parts 1500-1508), will evaluate potential environmental, social, and economic impacts of implementing a range of research and enhancement activities stipulated in the HMS Recovery Plan (2007) to address low juvenile seal survival in the NWHI. As you know, low survival to reproductive age in the NWHI has been identified as a main factor driving the current steep HMS population decline.

Given the jurisdiction of USFWS within the proposed project area (the NWHI) and your agency's technical expertise regarding much of the subject matter to be covered in the PEIS, we are inviting your agency to participate as a cooperating agency on the proposed action pursuant to the Council on Environmental Quality's Regulations for Implementing NEPA (40 CFR 1501.6).

Should USFWS decide to work with NMFS as a cooperating agency, we suggest that we meet to discuss developing an MOU to delineate our respective roles and responsibilities. Should you decide not to serve as a cooperating agency, please know that we will include USFWS in all of the public information gathering processes undertaken during the PEIS preparation. Regardless of your decision regarding this invitation, we look forward to continuing our coordination with USFWS on HMS recovery and research activities in the NWHI as co-trustees of the Papahānaumokuākea Marine National Monument.

We would appreciate being notified of your decision regarding this invitation on or before October 8, 2010. If you have any questions or would like to meet to discuss this request, please contact Jeff Walters, our Hawaiian monk seal recovery coordinator, at (808) 944-2235, or via email at [jeff.walters@noaa.gov](mailto:jeff.walters@noaa.gov).

Sincerely,

National Marine Fisheries Service  
1601 Kapiolani Blvd., Suite 1110  
Honolulu, Hawaii 96814-4700

Dear Mr. Tosatto:

Thank you for your letter dated September 14, 2010, regarding an invitation to participate as a cooperating agency on the preparation of the Programmatic Environmental Impact Statement (PEIS) to improve the survivability of the Hawaiian monk seal (HMS). The Hawaiian and Pacific Islands National Wildlife Refuge Complex recognizes the importance of this National Environmental Policy Act (NEPA) action to evaluate potential environmental, social, and economic impacts of implementing a range of research and enhancement activities identified in the HMS Recovery Plan (2007) to address low juvenile seal survival in the Northwestern Hawaiian Islands. On behalf of the Fish and Wildlife Service (FWS), we accept your invitation to participate in the preparation of this PEIS as a cooperating agency in accordance with NEPA regulations and procedures.

Based on FWS legally mandated management responsibilities and technical expertise associated with protecting, conserving, and, where appropriate, restoring fish, wildlife and plants and their habitats within the Hawaiian Islands and Midway Atoll National Wildlife Refuges, we look forward to working together with you on this PEIS. We also support your suggestion to develop a Memorandum of Understanding to delineate our respective roles and responsibilities.

I would also like to take this opportunity to introduce you to Mr. Thomas R. Edgerton, who will be arriving in Honolulu on November 8, 2010, to fill the currently vacant FWS Superintendent position for the Papahānaumokuākea Marine National Monument. Tom will be your point of contact for this cooperative effort and will also be replacing Ms. Susan White as the Fish and Wildlife Service member of the Hawaiian Monk Seal Recovery Team.

If you have additional questions or need assistance prior to Tom's arrival, please contact Ray Born, our Acting Superintendent, at 808.742.9488 or via email at [Ray\\_Born@fws.gov](mailto:Ray_Born@fws.gov).

Sincerely,

Barry W.
