

Mid-Atlantic U.S. Area
Mandatory Speed Restriction **November 1 through April 30**
Migratory Route

Vessel speed is restricted around each of the port or bay entrances identified and the designated area around Block Island Sound (a box with a 30 nm width extending south and east of the mouth of the Sound--reference points: Montauk Point and the western end of Martha's Vineyard). The areas are defined as the waters within a 20-nm area with an epicenter located at the midpoint of the COLREG demarcation line crossing the entry into the designated ports or bays.
