Marine Mammal Monitoring Final Report

Port of Friday Harbor Reconstruction: PFH2

Summary: This final report is a summary of the marine mammal monitoring activities performed in support of Manson Construction for the Port of Friday Harbor Reconstruction Project PFH2. San Juan Island Outfitters LLC provided the Marine Mammal Monitoring for the Pile Driving Activities during this project. Additionally the Port of Friday Harbor Staff provided Marine Mammal Monitoring Activities for the Pile Removal Activities. San Juan Island Outfitters has agreed to include the Pile Removal Data provided by The Port of Friday Harbor into this final Report.

In addition to providing numeric summaries of the data sheets provided, we have also provided a short summary of the observations during the project as industry professionals. If there are any questions about the data summaries or professional opinions provided you may contact the owner of San Juan Island Outfitters LLC, and the author of this report Brian Goodremont.

The numeric summaries of the data throughout the entire project and our professional summary can be found in the first three pages of this document. The supporting information and charted table summary follows in an itemized format by day as supporting documentation. At the end of the document you will find copies of all the data sheets from the entire project.

San Juan Island Outfitters executed to the letter the two governing documents provided to us. Those would be the Marine Mammal Monitoring Plan and the Incident Harassment Authorization. At no time during the project were any endangered species seen in the action area defined in the MMMP, and at no time were construction activities stopped due to marine mammals entering action areas or no-go areas as defined by the MMMP or IHA.

Special Note: San Juan Island Outfitters staff collected data on Stellar (Northern) Sea Lions under the IHA, even though they are mentioned in the Marine Mammal Monitoring Plan (MMMP) and the IHA. We consulted with Moffat Nichol for clarification and between the time the MMMP was created the IHA created, Stellar (Northern) Sea Lions had been removed from the endangered list and therefore the IHA dictated how we collected data on these animals.

Special Note: On October 29th our monitors observed a large group of 70-80 Pacific White Sided Dolphins in the action area prior to pile driving. Since the dolphins were moving out of the area prior to the predicted pile driving time their presence did not impact the construction activities. This special note is mainly to let NOAA and the Port of Friday Harbor know that as professional marine educators and monitors we are seeing higher occurrence of Pacific White Sided Dolphins in our area from late June through October, and future projects in this region should account for their presence in the MMMP and the IHA.

Special Note: San Juan Island Outfitters staff collected data on Stellar (Northern) Sea Lions under the IHA, even though they are mentioned in the Marine Mammal Monitoring Plan (MMMP) and the IHA. We consulted with Moffat Nichol for clarification and between the time the MMMP was created the IHA created, Stellar (Northern) Sea Lions had been removed from the endangered list and therefore the IHA dictated how we collected data on these animals.

Special Note: On October 29th our monitors observed a large group of 70-80 Pacific White Sided Dolphins in the action area prior to pile driving. Since the dolphins were moving out of the area prior to the predicted pile driving time their presence did not impact the construction activities. This special note is mainly to let NOAA and the Port of Friday Harbor know that as professional marine educators and monitors we are seeing higher occurrence of Pacific White Sided Dolphins in our area from late June through October, and future projects in this region should account for their presence in the MMMP and the IHA.

Marine Mammal Monitoring Summary

This table is a summary of the observations through the entire project. They are categorized as either pre/post pile driving observations or pile driving observations. This is due to the way observations are treated under the IHA. Pre and post pile driving observations are not considered "takes", while those observations occurring during pile driving are considered "takes".

Table 1. Take Summary by Species

Take Summary for PFH2 Project Sept. 29 2014 through Dec. 17 2014

SPECIES	ACTUAL TAKE	AUTH. TAKE
Harbor Seals (Phoca vitulina)	303	726
California Sea Lion (Zalophus californianus)	1	133
Stellar Sea Lion (Eumetopias jubatas)	2	162
Dall's Porpoise (Phocoenoides dalli)	0	81
Harbor Porpoise (phocoena phocoena)	11	376

Summary: Actual observations of marine mammals identified as takes did not approach the authorized number of takes identified in the IHA. At no time did construction activity need to be halted due to marine mammals in the action area. In our professional opinion the mitigation plan adequately accounted for the potential disturbance of marine mammals during this project.

Marine Mammal Monitoring: Final Report

Port of Friday Harbor Reconstruction: PFH2

Table 2. Summary by day

Table 2. DATA SUMMARY PILE REMOVAL: PFH2

Date	Species	Activity	Total # Observed
10/01/14	Harbor Seal	Pile Removal	3
10/20/14	Harbor Seal	Pile Removal	8
10/27/14	Harbor Seal	Pile Removal	3
11/04/14	Harbor Seal	Pile Removal	1
11/05/14	Harbor Seal	Pile Removal	5
12/30/14	Harbor Seal	Pile Removal	2
Total Observed Harbor Seals Takes during Pile Removal			**34**

	Harbor Seal Total on this day		**17**

Date	Species	Activity	Total Observed
12/17/14	Harbor Seal	Pre/post	11
	Harbor Seal	Pile Drive	**16**

Professional Summary:

San Juan Island Outfitters LLC was happy and privileged to provide professional Marine Mammal Monitoring Services for PFH2 Marina Reconstruction. As

professional monitors and marine educators we appreciate the opportunity to protect and monitor these species.

It is our opinion that during this construction project, the marine mammals we observed suffered very little if any negative impact. On only two occasions did we observe harbor seals appearing startled at the beginning of pile driving activity. On both occasions these animals were observed in the mid-channel location, over ½ mile from the pile driving activity. At no time did any organisms enter the 10 meter shut-down zone.

If there are any questions or concerns regarding our observations, or if further discussion or description is required, please contact Brian Goodremont of San Juan Island Outfitters LLC. Contact information is provided on the cover page of this document.

Sincerely,

Brian Goodremont

San Juan Island Outfitters LLC

Construction Activity (include pile information)	Monitor Location (Land/Vessel Detail)	Time	Weather Conditions (include Beaufort Scale #)	Species Type	#	Species Location (inner, mid, outer harbor or mid, outer channel)	Behavior (i.e. milling, logging, foraging, traveling)	Other Comments
Arriving	Marina	3:55	BS=0 cloudy	Harbor Seal	1	inner harbor	milling	

Summary for 9/30/2014

Port of Friday Harbor Marine Mammal Observation Sheet:

Marine Mammal Observations for: **Pile Removal Activities**

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

Date: 9/30/14

Sheet 1 of 1 for this day.

Monitor Name: COMPILED BY DON NIXON

Monitoring Location: _____

Sighting #	Time of Day	Weather Description | Sea State		Species	# of Individuals	Location*	Behavior
3	1200 to 1700	SUN - PARTLY CLOUDY	1	HARBOR SEALS	3	DOCK BRACE BREAKWATER A, B, C1	

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.

Summary for 9/30/2014

Port of Friday Harbor Marine Mammal Observation Sheet:

Marine Mammal Observations for: **Pile Removal Activities**

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

Date: 9/30/14

Sheet 1 of 1 for this day.

Monitor Name: DON NIXON

Monitoring Location: 10 METER ZONE AT DERRICK BARGE

Sighting #	Time of Day	Weather Description | Sea State	Species	# of Individuals	Location*	Behavior
NONE	—	—	—	—	—	—

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.

Marine Mammal Observations for: **Pile Removal Activities**

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

1 of 1 for this location

Date: 9/30/14

Sheet 2 of 2 for this day.

Monitor Name: Michael Long

Monitoring Location: Port C-Breakwater

Sighting #	Time of Day	Weather Description | Sea State		Species	# of Individuals	Location*	Behavior
1	1630	partly Cloudy	1	Harbor Seal	1	100 ft off BWB South end	Surfaced to Sniff

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.

Port of Friday Harbor Marine Mammal Observation Sheet:

Marine Mammal Observations for: **Pile Removal Activities**

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

Date: Sept 30 2014 Sheet 1 of 1 for this day.

Monitor Name: Jenny McElyea Monitoring Location: Breakwater A

Sighting #	Time of Day	Weather Description | Sea State		Species	# of Individuals	Location*	Behavior
1	1260	Sun/clouds	1	Harbor Seal	1	SW BWA	SP Hbr
2	1600	Sun/clouds	1	Harbor Seal	1	SE BWA	S-1 see looking around

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.

Port of Friday Harbor Marine Mammal Observation Sheet:

Marine Mammal Observations for: **Pile Removal Activities**

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

Date: 9/30/14

Sheet 1 of 1 for this day.

Monitor Name: Matt Orcutt

Monitoring Location: POFH - C Breakwater

Sighting #	Time of Day	Weather Description | Sea State	Species	# of Individuals	Location*	Behavior
NO sightings						

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.

SUMMARY FOR 10/1/2014

Port of Friday Harbor Marine Mammal Observation Sheet:

Marine Mammal Observations for: **Pile Removal Activities** – MONITORING BY PORT CREW

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

Date: 10/1/2014

Sheet 1 of 1 for this day.

Monitor Name: COMPILED BY DAN NIXON

Monitoring Location: _____

Sighting #	Time of Day	Weather Description | Sea State		Species	# of Individuals	Location*	Behavior
1-8	0855 to 1612	SUNNY	1	HARBOR SEALS	8	DERRICK BARGE BREAKWATER 'A' ~~BREAKWATER B-1~~ BREAKWATER C-1	

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.

SUMMARY FOR 10/1/14

Port of Friday Harbor Marine Mammal Observation Sheet:

Marine Mammal Observations for: **Pile Removal Activities**

Project Name: **Port of Friday Harbor Marina Improvements – Phase II**

Date: OCT 1 2014 Sheet 1 of 1 for this day.

Monitor Name: Jenny McElroy Monitoring Location: BARGE A

Sighting #	Time of Day	Weather Description | Sea State		Species	# of Individuals	Location*	Behavior
1	0925	Sunny	1	Harbor Seal	1	G-H	UP down 5.7sec
2	0945	Sunny	1	Harbor Seal	1	West of H	UP down 5.7sec

*E.g., Direction, Distance Estimate within harbor, or you can mark on a figure with the sighting number.
