

## NMFS ATLANTIC TUNAS PROGRAM FOR JANUARY 1, 2008 – DECEMBER 31, 2008 SUMMARY OF FISHERY INFORMATION AND REGULATIONS FOR ATLANTIC TUNA FISHERIES

### MANAGEMENT AUTHORITY

Atlantic tunas are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and the Atlantic Tunas Convention Act (ATCA). ATCA authorizes the Secretary of Commerce to implement the binding recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT). The authority to manage the U.S. Atlantic tuna fisheries is delegated to the National Marine Fisheries Service (NMFS), Highly Migratory Species (HMS) Management Division. In October 2006, NMFS adopted the Final Consolidated HMS Fishery Management Plan.

### REGULATED SPECIES

Tunas subject to regulation are Atlantic bluefin tuna (BFT) (*Thunnus thynnus*), as well as “BAYS” tunas, i.e., bigeye tuna (BET) (*Thunnus obesus*), albacore tuna (ALB) (*Thunnus alalunga*), yellowfin tuna (YFT) (*Thunnus albacares*), and skipjack tuna (SKJ) (*Katsuwonus pelamis*).

### MANAGEMENT AREA

These regulations apply in all waters of the Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea.

### OVERVIEW OF BFT DOMESTIC QUOTAS

The adjusted quota for the 2008 fishing year is 1,668.9 metric tons (mt). The Reserve, to be used for inseason adjustments, fishery research, and potential transfers to other ICCAT Contracting Parties, is set at 207.6 mt.

	<u>mt</u>		<u>mt</u>		<u>mt</u>
General	740.0	Purse Seine	292.2	Longline	81.7
Harpoon	61.2	Angling	309.5	Trap	1.6

Beginning January 1, 2008, the fishing year is January 1 through December 31.

### PERMIT PROGRAM

All owners/operators of vessels (commercial, charter/headboat, or recreational) fishing for regulated Atlantic tunas in the management area must obtain an Atlantic tunas permit or an Atlantic HMS vessel permit. Atlantic tunas permits are issued in five commercial categories: General, Harpoon, Purse Seine, Longline, and Trap. Atlantic HMS permits are issued in two categories: Recreational Angling and Charter/Headboat. Only one permit category may be assigned to a vessel.

Because of the change to a calendar year fishing year that started on January 1, 2008, Atlantic Tunas, HMS Charter/ Headboat, and HMS Angling category permits issued for the 2007 fishing year are effective through December 31, 2008. Permit holders may

make one permit category change for the 2008 fishing year, i.e., once during the period of January 1-May 31, 2008.

All fish dealers purchasing regulated Atlantic tunas from vessels holding an Atlantic tunas permit or an Atlantic HMS vessel permit must obtain an Atlantic tunas dealer permit. An International Trade Permit is required for the international trade of fresh or frozen bluefin tuna, southern bluefin tuna, swordfish, and/or frozen bigeye tuna.

Atlantic tunas may be sold only by fishermen permitted in commercial categories and only to permitted dealers. Atlantic tunas taken by persons aboard Angling category vessels may not be sold.

NMFS maintains an automated permitting system for the issuance of Atlantic tunas and HMS vessel permits. To apply for or renew an Atlantic tunas or HMS vessel permit, visit [www.hmspermits.gov](http://www.hmspermits.gov) or dial (888) 872-8862. Customer Service for the Automated Permitting System can be reached by pressing “0” from the main menu. To apply for an Atlantic tunas dealer permit, call the NMFS Northeast Permit Office at (978) 281-9370. To apply for an International Trade Permit, call the NMFS Southeast Permit Office at (727) 824-5326.

### LARGE PELAGIC SURVEY

NMFS collects data on fishing effort and catch for BFT and other pelagic fishes through the Large Pelagic Survey (LPS). Through telephone interviews (biweekly for private vessels and weekly for charter vessels), NMFS obtains information about fishing activity directed at large pelagic fishes. Captains are selected randomly from the permit list and may be contacted more than once during the fishing season. The telephone survey includes only questions about the number of fishing trips for the previous 2 weeks (1 week for charter vessels). In addition, field surveys collect biological samples and catch data for estimating annual catches of tunas and other large pelagic fishes.

Collection of information about recreational catch of Atlantic tunas is essential for stock assessments and reports to ICCAT. Cooperation with LPS dockside and telephone interviewers is required under the authority of ATCA. Note that the LPS will be used as independent validation of the Automated Landings Reporting System (ALRS) for BFT, thus a small degree of duplication is unavoidable. See the last page of this brochure for information regarding the ALRS.

For inseason fishery notices (retention limit adjustments, closures, etc.), visit [www.hmspermits.gov](http://www.hmspermits.gov), or call the Atlantic Tunas Information Line at (888) 872-8862 or (978) 281-9260.

## INDIVIDUAL CATEGORY INFORMATION

All fishing for any species must cease and the vessel must immediately return to port to off-load when the large medium or giant BFT bag limit is retained or possessed under regulations pertaining to the General, HMS Charter/Headboat, and HMS Angling category fisheries, as applicable. In the case of multi-day trips, the daily limit applies upon landing. **DIRECTED FISHING FOR BFT IN THE GULF OF MEXICO IS PROHIBITED.** Landing BFT > 73" is allowed in the Gulf of Mexico only under the HMS Angling category trophy and Longline category retention limits. Authorized gear for Atlantic tunas: Rod and reel (including downriggers), handline, speargun (recreational only and only for tunas other than BFT), harpoon, bandit gear, longlines, traps (pound nets and fish weirs), and purse seines. ## LANDINGS INFORMATION

### CURVED FORK LENGTH (CFL) MEASUREMENT

For enforcement purposes, total curved fork length is the sole criterion for determining the size class of whole (with head) Atlantic tunas. Measurements must be taken in a line, tracing the contour of the body from the tip of the upper jaw to the fork of the tail, which abuts the dorsal insertion of the pectoral fin and the dorsal side of the caudal keel. For tunas with heads removed, pectoral fin curved fork length (PFCFL) must be taken and multiplied by a conversion factor of 1.35 to obtain total curved fork length. Measurements must be taken from the dorsal insertion of the pectoral fin, tracing the contour of the body, to the fork of the tail. **THE TAPE MUST TOUCH THE TOP PORTION OF THE PECTORAL FIN.**

### LANDING FORM

Bluefin, bigeye, and yellowfin tuna may be landed round with fins intact, or eviscerated with the head removed, but with one pectoral fin and the tail remaining attached.

No person may retain or possess a BFT with the head removed that is less than 20 inches, PFCFL. No person may remove the head of a bigeye tuna or yellowfin tuna if the remaining portion would be less than 27 inches from the fork of the tail to the forward edge of the cut.

The minimum size for yellowfin and bigeye tuna is 27 inches curved fork length.

Landings of all BFT must be reported. If sold, the landings of large medium and giant BFT must be reported by a licensed dealer on landing cards faxed to the NMFS Northeast Regional Office. BFT not sold by commercial permit holders must be reported to the nearest NMFS Enforcement office upon landing. Recreational landings of large medium and giant (“trophy”) BFT must be reported as indicated in the HMS Angling category reporting at right side of page.

#### SIZE CLASS CATEGORIES OF BFT

Young School	< 27 "	< 20 "	< 14 lbs
School	27 - < 47"	20 - < 35"	14 - < 66 lbs
Large School	47 - < 59"	35 - < 44"	66 - < 135 lbs

Large Medium	73 - < 81"	54 - < 60"	235 - < 310 lbs
Giant	81" or >	60" or >	310 lbs or >

Since fishery rules are subject to change, fishermen must familiarize themselves with the latest regulations (via [www.hmspermits.gov](http://www.hmspermits.gov) or the Atlantic Tunas Information Line). Fishermen are responsible for complying with current official regulations.

## ADDRESS & TELEPHONE INFORMATION

NMFS maintains a 24-hour Information Line for news concerning Atlantic tunas. The Information Line, which is updated daily Monday through Friday, announces closure notices, inseason quota adjustments, and updates of commercial landings for BFT. This information is also available on the website.
