

Atlantic Swordfish Landings Update: Commercial and Recreational 2011 Fishing Year

The table below provides preliminary landings estimates and remaining quotas as of November 30, 2011, in pounds (lb) and metric tons (mt) dressed weight (dw) for the Atlantic swordfish fisheries for the 2011 fishing year. Landings are estimated using commercial dealer reports and reports by anglers in the HMS Non-Tournament Recreational Swordfish and Billfish Landings Database and the Recreational Billfish Survey. Please note that these estimates are subject to late reporting and do not include discards. As specified in § 635.27(c)(i)(B), all recreational landings are counted against the incidental quota. The table below provides both the baseline and adjusted 2011 quotas per the final rule that published on September 12, 2011 (76 FR 56120).
