

Atlantic Swordfish Landings Update: Commercial and Recreational January 1 – June 30, 2012

The table below provides preliminary landings estimates and remaining quotas as of June 30, 2012, in pounds (lb) and metric tons (mt) dressed weight (dw) for the Atlantic swordfish fisheries for the 2012 fishing year. We estimate landings using commercial dealer reports and reports by anglers in the HMS Non-Tournament Recreational Swordfish and Billfish Landings Database and the Recreational Billfish Survey. Please note that these estimates are subject to late reporting and do not include discards.

On July 31, 2012, we published a final rule (77 FR 45273) to adjust the 2012 base quotas for 2011 underharvests and to deduct the 112.8 mt dw quota transfer to Morocco pursuant to International Commission for the Conservation of Atlantic Tunas Recommendation 11-02. Additionally, the adjusted quota reflects a 50 mt dw allocation to the reserve category. The table below provides both the baseline and adjusted 2012 quotas.

	2012 Baseline Quota (mt dw)	2012 Adjusted Quota (mt dw)		2012 Landings	Percent of 2012 Baseline Quota Taken	Percent of 2012 Adjusted Quota Taken
