

NMFS Maintains Three-fish General Category (Commercial) Atlantic Bluefin Tuna Daily Retention Limit for September-December 2010

The National Marine Fisheries Service (NMFS) maintains the current General category daily Atlantic bluefin tuna (BFT) retention limit of **three** large medium or giant BFT (measuring 73" or greater) per vessel per day/trip for September 1 through December 31, 2010. NMFS takes this action after consideration of the regulatory determination criteria regarding inseason adjustments.

The General category daily retention limit applies to vessels permitted in the Atlantic tunas General category and the Highly Migratory Species (HMS) Charter/Headboat category *while fishing commercially*. These limits are effective for all areas except for the Gulf of Mexico, which are designated spawning grounds for BFT and where NMFS does not allow targeted fishing. Regardless of the duration of a fishing trip, the daily retention limit applies upon landing. For example, whether a vessel fishing under the General category limit takes a two-day trip or makes two trips in one day, the daily limit of three fish may not be exceeded upon landing.

This notice is a courtesy to BFT fishery permit holders to help keep you informed about your fishery. For additional information, call (888) 872-8862 or (978) 281-9260, or go to www.hmspermits.gov. Official notice of Federal fishery actions is made through filing such notice with the Office of the Federal Register.
