

Electronic Video Monitoring Currently Implemented Worldwide¹

Council Coordination Committee
May 1-3, 2012

Australia:

- South Australia shark gillnet
- East Australia tuna and billfish longline

British Columbia, Canada:

- Groundfish hook and line
- Groundfish Option B (Inside) trawl
- Whiting fishery

Europe: The following countries have EM programs of varying scale:

- Denmark
- Scotland
- England
- Sweden
- Germany
- Netherlands

United States:

- Alaska (EM for compliance monitoring and not fisheries data collection)
 - BSAI Groundfish - bin monitoring
 - BSAI Groundfish – Chinook salmon monitoring

Note: EM is currently being tested on tuna purse seine vessels in the Indian Ocean and Western and Central Pacific Ocean, which is a first for this type of fishing gear
